

# Milk Production

United States  
Department of  
Agriculture

Washington, D.C.

---

Released June 15, 1994, by the Agricultural Statistics Board.

## May Milk Production

Milk production in the 21 major States during May totaled 11.5 billion pounds, 1 percent more than production in these same States in May 1993. April revised production at 11.0 billion pounds was 1 percent above April 1993.

Production per cow in the 21 major States averaged 1,431 pounds for May, 29 pounds more than May 1993.

The number of cows on farms in the 21 major States was 8.02 million head, 122,000 head less than May 1993 but 3,000 head more than April 1994.

During the January-March period, the 21 major States produced 31.5 billion pounds of milk, 83.8 percent of the U.S. production. If producers in the remaining 29 States not surveyed monthly followed the same pattern as the 21 States, the U.S. production would be 13.7 billion pounds for May 1994.

<sup>1/</sup> 1993 and 1994 revised. <sup>2/</sup> Includes dry cows. Excludes heifers not yet fresh. <sup>3/</sup> Excludes milk sucked by calves.

## All Milk Cows, 1989-1994 21 States

**Survey Procedures:** Primary data used to determine these estimates were obtained from a sample of producers. Individual States maintain a list of all known milk producers and information on the size of their herd. States use all known sources of producers to ensure that their lists are as complete as possible. About 20,000 producers are sampled in January and data are collected from about 10,000 respondents. There are about 7,300 respondents in each of the remaining quarters. Generally all large producers and a sample of small producers are included in the survey. Questionnaires are mailed to producers near the end of the month to obtain data for the first day of the month. Additional reports are obtained by telephone, as needed, to supplement the mail response.

**Estimation Procedures:** State offices prepare these estimates using survey indications, historic trends, and any available administrative data. Individual State estimates are reviewed by the Agricultural Statistics Board for reasonableness.

**Revision Policy:** Milk production, rate per cow, and number of cows are subject to revision the following month for monthly States or the following quarter for the quarterly States. Normally, Federal Market Order sales are the main basis for revisions. However, data for all orders are not available in time for this revision. Estimates are again subject to revisions in February each year based on additional administrative data. In the event that additional changes are necessary, a third revision is possible in February the following year. Estimates are again reviewed after data from the five-year Census of Agriculture, conducted by the Department of Commerce, are available. No revisions are made after that date.

**Reliability:** Since all operations with dairy animals are not included in the sample, survey estimates are subject to sampling variability. Survey results are also subject to non-sampling errors such as omissions, duplications, and mistakes in reporting, recording, and processing the data. The effects of these errors cannot be measured directly. They are minimized through rigid quality controls in the data collection process and through a careful review of all reported data for consistency and reasonableness.

To assist users in evaluating the reliability of the estimates in this report, the "Root Mean Square Error" is shown for selected items in the table below. The "Root Mean Square Error" is a statistical measure based on past performance and is computed using the differences between first and final estimates. The "Root Mean Square Error" for milk cow inventory estimates over the past 10 quarters is 0.4 percent. This means that chances are 2 out of 3 that the final estimate will not be above or below the current estimate of 9.61 million head by more than 0.4 percent, or about 38,000 head. Chances are 9 out of 10 that the difference will not exceed 0.8 percent, or about 76,800 head (the 90 percent confidence level).

Reliability of January-March Milk Estimates 1/

Item	Root Mean Square Error	90% Confidence Level	Difference Between First and Final Estimates <u>1/</u>				Number of Quarters	
			Average	Smallest	Largest	First Above Final	First Below Final	
	- Percent -		----- Mil Lbs. -----			- Number -		
Milk Production	0.4	0.7	262	119	7	271	8	2
			----- 1,000 Head -----					
All Milk Cows	0.4	0.8	77	31	1	90	9	1

1/ Based on records for the past 10 January-March quarters.

The next "Milk Production" report will be released at 3 p.m. ET on July 15, 1994.
