

Milk Production

United States
Department of
Agriculture

Washington, D.C.

Released December 15, 1995, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on "Milk Production" call Kevin Hintzman at (202) 720-4448, office hours 8:00 a.m. to 4:30 p.m. ET. For assistance with general agricultural statistics, information about NASS, its products or services, contact the NASS Information Hotline at 1-800-727-9540 or E-mail: NASS@AG.GOV.

November Milk Production Up Slightly

Milk production in the 22 major States during November totaled 10.6 billion pounds, slightly above production in these same States in November 1994. October revised production, at 11.0 billion pounds was slightly more than October 1994.

Production per cow in the 22 major States averaged 1,315 pounds for November, 3 pounds above November 1994.

The number of cows on farms in the 22 major States was 8.09 million head, 9,000 head less than both November 1994 and October 1995.

During the July-September period, the 22 major States produced 33.3 billion pounds of milk, 86.6 percent of the U.S. production. If the remaining 28 States not surveyed monthly followed the same pattern as the 22 States, the U.S. production would be 12.3 billion pounds for November 1995.

Milk Cows and Production: By Quarter, United States, 1994-95

Quarter	Milk Cows 1/		Milk per Cow 2/		Milk Production 2/		1995 as % of 1994
	1994	1995	1994	1995	1994	1995	
	---- 1,000 ----		Pounds		Million Pounds		Percent
Jan-Mar	9,506	9,517	3,951	4,093	37,560	38,950	104
Apr-Jun	9,530	9,516	4,188	4,254	39,916	40,484	101
Jul-Sep	9,539	9,518	4,007	4,040	38,217	38,453	101
Oct-Dec	9,524		3,983		37,933		
Annual	9,525		16,129		153,626		

1/ Includes dry cows, excludes heifers not yet fresh.

2/ Excludes milk sucked by calves.

Milk Cows and Production: By Month, 22 Selected States, 1994-95

Month	Milk Cows 1/		Milk per Cow 2/		Milk Production 2/		1995 as % of 1994
	1994	1995	1994	1995	1994	1995	
	---- 1,000 ----		Pounds		Million Pounds		Percent

1/ 1995 revised. 2/ Includes dry cows, excludes heifers not yet fresh.
 3/ Excludes milk sucked by calves.

November Milk Cows, 1986-1995
 22 States 1/

1/ Includes New Mexico beginning in 1994.

Survey Procedures: Primary data used to determine these estimates were obtained from a sample of producers. Individual States maintain a list of all known milk producers and information on the size of their herd. States use all known sources of producers to ensure that their lists are as complete as possible. Generally, all large producers and a sample of small producers are included in the survey. Questionnaires are mailed to producers near the end of the month to obtain data for the first day of the month. Additional reports are obtained by telephone, as needed, to supplement the mail response.

Estimation Procedures: State offices prepare these estimates using survey indications, historic trends, and any available administrative data. Individual State estimates are reviewed by the Agricultural Statistics Board for reasonableness.

Revision Policy: Milk production, rate per cow, and number of cows are subject to revision the following month for monthly States or the following quarter for the quarterly States. Normally, Federal Market Order sales are the main basis for revisions. However, data for all orders are not available in time for this revision. Estimates are again subject to revisions in February each year based on additional administrative data. In the event that additional changes are necessary, a third revision is possible in February the following year. Estimates are again reviewed after data from the five-year Census of Agriculture, conducted by the Department of Commerce, are available. No revisions are made after that date.

Reliability: Since all operations with dairy animals are not included in the sample, survey estimates are subject to sampling variability. Survey results are also subject to non-sampling errors such as omissions, duplications, and mistakes in reporting, recording, and processing the data. The effects of these errors cannot be measured directly. They are minimized through rigid quality controls in the data collection process and through a careful review of all reported data for consistency and reasonableness.

To assist users in evaluating the reliability of the estimates in this report, the "**Root Mean Square Error**" is shown for selected items in the table below. The "Root Mean Square Error" is a statistical measure based on past performance and is computed using the differences between first and final estimates. The "Root Mean Square Error" for milk cow inventory estimates over the past 10 quarters is 1.3 percent. This means that chances are 2 out of 3 that the final July-September estimate will not be above or below the current estimate of 9.52 million head by more than 1.3 percent, or about 124,000 head. Chances are 9 out of 10 that the difference will not exceed 2.3 percent, or about 219,000 head (the 90 percent confidence level).

Reliability of July-September Milk Estimates 1/

Item	Root Mean Square Error	90% Confidence Level	Difference Between First and Final Estimates 1/			Number of Quarters		
			Average	Smallest	Largest	First Above Final	First Below Final	
	- Percent -		Mil Lbs.			- Number -		
Milk Production	0.9	1.6	616	270	15	538	10	0
All Milk Cows	1.3	2.3	219	113	15	179	10	0

1/ Based on records for the past 10 July-September quarters.

The next **"Milk Production"** report will be released at 3 p.m. ET on January 16, 1996.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status.
