# NONCITRUS FRUITS & NUTS

## 1982 ANNUAL SUMMARY

PRODUCTION

USE

VALUE

\*\*\*\*\*  
\* The Crop and Livestock estimating program was modified in \*  
\* 1982 to stay within the fiscal 1982 funding level. As part of \*  
\* this modification process, estimates for a number of data series \*  
\* were either discontinued or curtailed. Estimates for commercial \*  
\* apple production by varieties and all estimates for blueberries \*  
\* and other bushberries were among the data series discontinued. \*  
\* With the exception of these three data series, the content of \*  
\* this publication is the same as in recent years. \*  
\* \*  
\* In the Noncitrus Fruits and Nuts Midyear Supplement, pub- \*  
\* lished in July 1982, data for apricots, sweet and tart cherries, \*  
\* cranberries, nectarines, olives, peaches, pomegranates and Cali- \*  
\* fornia plums were pulled forward from the 1981 Noncitrus Fruits \*  
\* and Nuts Annual Summary published January 13, 1982. Therefore, \*  
\* 1980 and 1981 value of production data for the above crops did \*  
\* not incorporate new computational methods that went into effect \*  
\* in March of 1982. Value of production data for the above crops \*  
\* for 1980 and 1981, using the new method of computation, are \*  
\* shown in this publication for the first time. \*

## FRUIT PRODUCTION HIGHER, VALUE FRACTIONALLY LOWER

The Nation's utilized production of the leading noncitrus fruit crops, excluding avocados, totaled 13.7 million tons (12.5 million metric tons) in 1982, 8 percent more than a year earlier, but 7 percent less than 1980. For major noncitrus crops, increases were registered for apples and grapes but these were partially offset by decreases for peaches, pears, pineapples, plums and prunes. Higher production was also recorded for apricots, tart cherries, cranberries, kiwifruit and olives. Sweet cherries, nectarines, and papayas showed declines. Production and value for the 1982-83 avocado crop will be available July 5, 1983.

The value of utilized production for the above noncitrus fruit crops totaled 3.26 billion dollars, excluding avocados, fractionally lower than a year earlier and 2 percent above 1980. Increases in crop values for apples, apricots, cranberries, nectarines, olives, pineapples and California plums were more than offset by declines in cherries, figs, grapes, peaches and pears.

## NUT OUTPUT DOWN--VALUE UP

The 1982 season's U.S. nut production, at 669 thousand tons (606 thousand metric tons), was 13 percent less than in 1981 but 12 percent more than the 1980 output. Production of filberts and pistachios increased from last season, almonds, macadamia nuts and pecans declined, while walnuts were unchanged.

The value of 1982 utilized production of these edible nut crops, excluding walnuts, was 566 million dollars, up 2 percent from a year earlier but 21 percent below the 1980 value. Values increased for 1982 crops of almonds, filberts, and pistachios, but declined for macadamia nuts and pecans. Value for the 1982 walnut crop will be available July 5, 1983.

APPLES: U.S. commercial apple production totaled 8.21 billion pounds (3.72 million metric tons) in 1982, 6 percent above the previous year's crop but 7 percent less than the 1980 record crop. Of the total production, 8.20 billion pounds were utilized, 6 percent more than in 1981. There were 3.13 billion pounds utilized in the East. This was up 13 percent from the previous year's crop. Utilized production was up 27 percent in the Central States to 1.45 billion pounds. The Western States utilized 3.62 billion pounds, down 5 percent from 1981.

Washington, the leading State, produced 2.75 billion pounds, fractionally below the previous year's crop. Production in New York, the second ranking State, totaled 1.13 billion pounds, up 41 percent from 1981. Michigan ranked third with 950 million pounds produced.

APRICOTS: The 1982 U.S. apricot crop was 113 thousand tons (102 thousand metric tons), 26 percent above the small 1981 production, but 12 percent less than 1980.

AVOCADOS: Production of California and Florida avocados during the 1981-82 marketing year was 181 thousand tons (164 thousand metric tons), 33 percent less than the record 1980-81 production. A preliminary production estimate for the 1982-83 marketing season will be available July 5, 1983.

BANANAS: The 1982 Hawaiian banana crop is placed at 5.66 million pounds (2570 metric tons), 6 percent below the previous year's large crop.

SWEET CHERRIES: U.S. production of sweet cherries was 158 thousand tons (144 thousand metric tons) in 1982, a 3 percent increase from the 1981 total. Of this total, 136 thousand tons were utilized, 7 percent less than a year earlier. Fresh use accounted for 49 percent of the utilized production compared to 48 percent the previous year. Processing tonnage accounted for the remaining 51 percent, down from 52 percent in 1981.

TART CHERRIES: Tart cherry production totaled 311 million pounds (141 thousand metric tons) in 1982, more than double the 1981 crop. Most of the production increase came from Michigan, the leading State, where total production almost tripled 1981's level. Of the total production, 245 million pounds were utilized. Quantity processed totaled 238 million pounds. Of the quantity processed, 98 percent went to two uses: 30 percent was canned and, 68 percent was frozen, both the same as in 1981.

CRANBERRIES: Production of cranberries in the U.S. was 3.05 million barrels (138 thousand metric tons) in 1982, 18 percent above the previous year's crop, setting a new record. The area harvested, at 23.2 thousand acres (9390 hectares), was virtually unchanged from 1981. Average yield rose 19.4 barrels from 1981 to 131 barrels per acre, also a new record. Decreased production in Oregon and Washington were offset by increases in Massachusetts, New Jersey and Wisconsin.

DATES: The 1982 California date crop totaled 22.7 thousand tons (20.6 thousand metric tons), 2 percent more than the 1981 crop and 1 percent above the 1980 harvest.

FIGS: California's 1982 fig production is placed at 35.3 thousand tons (32.0 thousand metric tons), 6 percent below the previous year's crop and 22 percent less than 1980.

GRAPES: The U.S. production of grapes was a record high 6.43 million tons (5.84 million metric tons) in 1982, 44 percent greater than the previous year and 15 percent more than the previous record high production in 1980. Of the total production for 1982, 5.65 million tons (5.13 million metric tons) were utilized.

California production totaled a record high 5.96 million tons (5.18 million tons utilized), 49 percent more than 1981. Weather related problems in the fall caused 780 thousand tons of production to be lost in California. However, harvested yields were near the records established in 1980. Utilized production of wine variety grapes in California, at 2.13 million tons, was up 19 percent from the previous year. Utilized production of table varieties was 600 thousand tons, up 43 percent from 1981. Production utilized from raisin varieties was 2.45 million tons compared with 1.78 million tons the previous year.

Utilized production in the other States totaled 477 thousand tons, 3 percent more than in 1981. Washington's 169 thousand ton crop was up 6 percent from 1981 and New York's 157 thousand ton crop was 5 percent above the previous year.

KIWIFRUIT: Utilized production for California's kiwifruit crop was 11.7 thousand tons (10.6 thousand metric tons), which compares to 5.5 thousand tons (5.0 thousand metric tons) utilized in 1981.

NECTARINES: The California nectarine crop totaled 173 thousand tons (157 thousand metric tons) in 1982, 5 percent less than the 1981 production and 9 percent less than the record 1980 crop.

OLIVES: Olive production in California totaled a record high 146 thousand tons (132 thousand metric tons) in 1982, more than three times larger than the small crop of 1981 and 34 percent higher than 1980 production. The exceptionally large crop resulted from ideal growing conditions.

PAPAYAS: Utilized production of Hawaiian papayas in 1982, at 51.6 million pounds (2340 thousand metric tons), was 19 percent below 1981 utilization, but 5 percent above 1980.

PEACHES: U.S. peach production in 1982 totaled 2.29 billion pounds (1.04 million metric tons), of which 2.11 billion pounds were utilized. This was 20 percent below the previous year's utilized total and 29 percent less than 1980. The California Clingstone utilized crop totaled 943 million pounds, down 15 percent from 1981 and off 32 percent from 1980.

Excluding California Clingstone peaches, U.S. utilized peach production was 1.17 billion pounds, down 25 percent from 1981 and down 26 percent from 1980. Utilized production was down 52 percent in South Carolina, down 4 percent in California and down 12 percent in Georgia. These are the three largest Freestone producing States.

PEARS: There was a 10 percent decrease in pear production in 1982 to 806 thousand tons (731 thousand metric tons). Virtually all the crops was utilized. The three Pacific Coast States produced 763 thousand tons, or 95 percent of the total. Bartlett production in the Pacific Coast States totaled 526 thousand tons, 12 percent less than 1981, while other pears at 237 thousand tons were off 9 percent. All States reported decreased production except Michigan, New York and Pennsylvania.

PINEAPPLES: The preliminary estimate for 1982 Hawaii pineapple production is 605 thousand tons (549 thousand metric tons), 5 percent below 1981 production and 8 percent less than 1980.

POMEGRANATES: Utilized production of California pomegranates in 1982 was 8.50 thousand tons (7.71 thousand metric tons), 19 percent below the 1981 utilized crop and 29 percent less than 1980.

PRUNES AND PLUMS: The 1982 prune and plum crop in Idaho, Michigan, Oregon, and Washington totaled 59.5 thousand tons (54.0 thousand metric tons), 13 percent less than 1981 and 24 percent below 1980.

The 1982 California plum crop at 119 thousand tons (108 thousand metric tons), was 40 percent less than the 1981 crop and 26 percent below 1980. Prune production in California decreased 21 percent from 1981 to 125 thousand tons (113 thousand metric tons) and was 26 percent less than the 1980 crop.

ALMONDS: California's 1982 production of almonds was 345 million pounds of nut meats (156 thousand metric tons), 15 percent less than the record high 1981 production, but 7 percent above the 1980 crop.

FILBERTS: Filbert production in Oregon and Washington in 1982 totaled a record high 18.5 thousand tons (16.8 thousand metric tons), 26 percent more than 1981 production and 20 percent above the 1980 crop.

MACADAMIA NUTS: Utilized production for the 1982 Hawaiian macadamia nut crop was 32.0 million pounds (14.5 thousand metric tons), 4 percent below both the 1981 and 1980 crops.

PECANS: The preliminary 1982 estimate of U.S. pecan production is 199 million pounds (90.4 thousand metric tons), 41 percent less than the large crop of 1981, but 9 percent above 1980. Improved varieties accounted for 72 percent of the total crop in 1982, compared with 51 percent in 1981 and 70 percent in 1980.

PISTACHIOS: The California pistachio crop totaled 43.5 million pounds in-shell (19.7 thousand metric tons), three times as large as the 1981 crop and 62 percent more than the 1980. Of this total, 37.7 million pounds were marketable in-shell. The larger crop was primarily the result of excellent yields but bearing acres also increased.

WALNUTS: The preliminary production estimate for the 1982 California walnut crop is 225 thousand tons (204 thousand metric tons), the same as the record high 1981 crop and 14 percent more than the 1980 crop.

1/ THIS YIELD IS BASED ON TOTAL PRODUCTION WHICH INCLUDES UNHARVESTED PRODUCTION AND FRUIT HARVESTED BUT NOT SOLD DUE TO MARKETING CONDITIONS. YIELD SHOWN FOR PREVIOUS YEARS IS BASED ON UTILIZED PRODUCTION. THIS YIELD IS 30.1 FOR 1981 AND 23.6 FOR 1982.  
 2/ PRODUCTION AND PROCESSED UTILIZATION ON A FRESH WEIGHT BASIS.  
 3/ PROCESSED PRICE REFLECTS VALUE OF FRESH FRUIT DELIVERED PROCESSING PLANT DOOR. FRESH MARKET PRICE REFLECTS VALUE AT WHOLESALE ESTABLISHMENTS FOR LOCAL SALES AND SHIPPERS DOCK FOR MAINLAND AND FOREIGN SALES.  
 4/ ACREAGE IS TOTAL ACRES IN CROP, NOT HARVESTED ACREAGE.

1/ BUDDED, GRAFTED, OR TOPWORKED VARIETIES.

## DEFINITIONS OF TERMS

Total Production - is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic reasons or natural reasons.

Utilized Production - is the amount sold plus the quantities used at home or held in storage.

Unutilized Production - is the difference between total and utilized production which is fruit not harvested for economic or natural reasons and harvested fruit not sold or utilized.

Utilization - refers to first utilization, not necessarily final utilization. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

Apples, Commercial Crop - orchards of 100 or more bearing age trees.

Prices - are a season average for all methods of sale. For a crop sold for both fresh market and processing, the season average price is a weighted average of the fresh and processing price.

Prices for fresh fruit are the average prices producers receive at the point of first sale. This is commonly referred to as the average price as sold. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit is sold f.o.b. packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands, the fresh fruit average price as sold is a weighted average of the average price for each method of sale. The exception is fresh fruit sales in California, Washington and Oregon which are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices.

F.o.b. packed prices are adjusted to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the f.o.b. price. These costs include grading, packing, inspecting fees, selling, and other costs.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door except for cranberries and California olives and clingstone peaches which are priced at the first delivery point.

Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops which are on a calendar year. The following procedure is used to compute State values for all commodity groups:

State Value Computation Procedure

$$\begin{aligned}
 \text{Fresh Market Value} &= \text{Fresh Market SAP} \times \text{Fresh Market Utilization} \\
 \text{Process Market Value} &= \text{Process Market SAP} \times \text{Process Market Utilization} \\
 \text{"All" Sales Value} &= \text{Fresh Market Value} + \text{Process Market Value} \\
 \text{"All" Sales SAP} &= \frac{\text{"All" Sales Value}}{\text{"All" Sales Utilization}}
 \end{aligned}$$

For commodities with components not identified by market channel, substitute breakdown name for fresh/processing market and use the same procedure. The procedure used for computation of U.S. season average prices follows:

U.S. SAP Computation Procedure

$$\begin{aligned}
 \text{Fresh Market SAP} &= \frac{\text{Fresh Market Value for all States}}{\text{Fresh Market Utilization for all States}} \\
 \text{Process Market SAP} &= \frac{\text{Process Market Value for all States}}{\text{Process Market Utilization for all States}} \\
 \text{"All" Sales SAP} &= \frac{\text{Sales Value for all States}}{\text{Sales Utilization for all States}}
 \end{aligned}$$

FRUITS (NONCITRUS): MARKETING SEASONS FOR SPECIFIED CROPS

Apples: All South Atlantic States, Kentucky, Tennessee, Indiana, Illinois, Missouri, Arkansas, New Mexico, and California, June 1 to May 31; all other States, July 1 to June 30, except Washington and Oregon where the bulk of the crop is marketed August 1 to July 31.

Apricots: Fresh fruit -- May 25 to August 20.  
Canning -- June 15 to August 15.  
Dried -- California, June 20 to August 20.

Avocados: California -- November 1 to November 30 (following year).  
Florida -- June 20 to Feb 28.

Bananas: January 1 to December 31.

Cherries: Fresh fruit -- Sweet varieties, May 1 to August 15;  
Tart varieties, June 15 to August 20.

Cranberries: September 5 to December 20.

Dates: August 15 to March 15.

Figs: Fresh fruit -- June 5 to October 15.  
Canning -- August 1 to October 15.  
Dried -- California, June 20 to October 31.

Grapes: Fresh fruit -- California, May 25 to April 30;  
Arizona, June 5 to July 15;  
All other States, July 10 to October 31.  
Crushed for juice, wine and brandy -- August 1 to December 15.  
Dried for raisins -- California, September 1 to May 30.

Kiwifruit: November 1 to April 30.

Nectarines: June 10 to August 31.

Olives: September 25 to March 15.

Papayas: January 1 to December 31. (Peak harvest May 15 to July 15 and September 15 to December 15).

FRUITS (NONCITRUS): -MARKETING SEASONS FOR SPECIFIED CROPS--CONTINUED

Peaches:                    Fresh fruit -- Georgia and South Carolina, May 20 to August 31; Other South Atlantic States, South Central States, and California, June 1 to September 30; New England States, New York, Michigan, and Idaho, August 1 to September 30; all other States, July 1 to September 30.

Canning -- California, July 1 to September 10.  
                              Dried -- California, August 1 to October 10.

Pears:                      Fresh fruit -- California, July 1 to April 30; Washington and Oregon, August 10 to May 31; Other States, July 1 to December 15.

Canning and dried -- California, Washington and Oregon, August 1 to November 30.

Pineapples:                January 1 to December 31. (Peak harvest March 1 to July 31).

Pomegranates:             September 15 to November 10.

Plums:                      Fresh fruit -- California, May 25 to September 30.  
                              Canning -- California, June 1 to September 30.

Prunes:                     Dried -- California, August 1 to April 31.

Prunes and Plums:        Fresh fruit and canning -- Idaho, Michigan, Oregon and Washington, August 10 to October 20.

TREE NUTS

Almonds:                   August 5 to November 15.

Filberts:                   October 1 to September 30.

Macadamia Nuts:         January 1 to December 31 (Peak harvest August 1 to December 31).

Pecans:                    September 30 to March 15.

Pistachios:                September 1 to October 31.

Walnuts:                   September 15 to December 30.
