2000 Noncitrus Fruit Utilized Production Up 9 Percent, Value Down 2 Percent from 1999

In 2000, the Nation's utilized production of the leading noncitrus fruit crops totaled 18.8 million tons, up 9 percent from 1999's production. Utilized production increased from last year for all crops except apples, apricots, boysenberries, sweet cherries, cranberries, dates, nectarines, olives, and pears.

Value of utilized production for noncitrus fruit crops totaled 7.88 billion dollars, down 2 percent from 1999. The value of apples decreased 15 percent, but grape and peach values were both higher by 6 percent. Strawberries showed a decreased value of 8 percent.

Highlights

Utilized apple production for 2000 was estimated at 10.4 billion pounds, down 1 percent from the 1999 level. Production in Western States increased as a result of favorable spring growing conditions but was more than offset by production decreases in the Central and Eastern States.

Utilized grape production for 2000 totaled a record high 7.66 million tons, up 23 percent from 1999's crop. The California crop, which accounts for 92 percent of the U.S. grape production, was up 27 percent from last year. Also for California, wine type production increased 26 percent from 1999, raisin type production rose 36 percent, and table type production was 2 percent higher. Utilized production increased in many States with California leading the way. Several States, however, had significantly decreased production with New York and Pennsylvania the leading decliners from the previous year.

Utilized peach production in 2000 was estimated at 2.51 billion pounds, up 3 percent from last year and 8 percent above 1998. The California crop, accounting for 72 percent of the U.S. peach production, was up 1 percent from 1999. For California, Clingstone peaches were down 1 percent while Freestone peaches were up 4 percent from 1999.

Utilized pear production, at 949,170 tons, was down 6 percent from last year's crop. Washington and California, the top producing States, were down 4 percent and 13 percent, respectively. Utilized pear production in Oregon, the third largest producing State, was down 3 percent from 1999.

U.S. Nut Production Down, Value Increases

The 2000 U.S. nut production (in-shell basis) dropped to 1.09 million tons, a 16 percent decrease from a year earlier. A record high pistachio crop of 121,500 tons was realized in 2000, up 98 percent from 1999. All other tree nuts showed the effects of alternate bearing with lower production than in the previous year. Almond production totaled 573,400 tons, down 15 percent. Hazelnut tonnage for the 2000 crop totaled 24,000 tons, down 40 percent from the previous year. Walnut production totaled 239,000 tons, a 16 percent decrease. Macadamia production, at 25,000 tons, was off 12 percent. Pecan production totaled 104,900 tons, a 48 percent decrease.

The 2000 U.S. value of utilized nut production decreased less than 1 percent to 1.50 billion dollars. Pistachios, with a record high crop, recorded a 46 percent increase in value despite a lower price per pound. The almond value decreased 1 percent and accounted for 45 percent of the total nut value. Hazelnut value fell 40 percent, to 21.4 million dollars. The smaller pecan crop translated into a 28 percent decrease in value even though average prices for improved and native seedling nuts were higher than 1999 prices. Walnut value increased 15 percent to 289 million dollars. The macadamia value decreased 22 percent, to 29.5 million dollars.

Definition of Terms

Apples, Commercial Crop refers to orchards of 100 or more bearing age trees.

Bearing Acreage - An orchard, grove, or vineyard is considered bearing when it reaches an age when it can normally be expected to produce a commercially significant quantity of the crop. Bearing age is a function of many factors including variety, rootstock, year planted, etc. Bearing acreage is primarily based upon periodic orchard surveys. In non-survey years, bearing acreage is based on trends, county extension service data, end-of-year production surveys, and other indications.

Prices are a marketing year average for all methods of sale. For a crop sold for both fresh market and processing, the **Marketing Year Average Price (MYA)** is a weighted average of the fresh and processing price.

Prices for fresh fruit are the average prices producers receive at the point of first sale. This is commonly referred to as the **average price as sold**. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit is sold F.O.B. packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands, the fresh fruit **average price as sold** is a weighted average of the average price for each method of sale. The exception is fresh fruit sales in California, Washington, New York (apples only) and Oregon (except peaches) which are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices.

F.O.B. packed prices are adjusted to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the F.O.B. price. These costs include grading, packing, inspecting fees, selling, and other costs.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door except for cranberries, California olives, and clingstone peaches which are priced at the first delivery point.

Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops which are on a calendar year.

Total Production is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic or natural reasons.

Unutilized Production is the difference between total and utilized production which is fruit not harvested for economic or natural reasons and harvested fruit not sold or utilized.

Utilization refers to first utilization, not necessarily final utilization. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

Utilized Production is the amount sold plus the quantities used at home or held in storage.

Yield per Acre is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.

State Value of Utilized Production and MYA Price Computations

The following procedure is used to compute State Values of Utilized Production and MYA Prices:

$$\text{Fresh Market Value} = \frac{\text{Fresh Market MYA Times}}{\text{Fresh Market Utilization}}$$

$$\text{Process Market Value} = \frac{\text{Process Market MYA Times}}{\text{Process Market Utilization}}$$

$$\text{"All" Sales Value} = \text{Fresh Market Value} + \text{Process Market Value}$$

$$\text{"All" Sales MYA} = \frac{\text{"All" Sales Value}}{\text{"All" Sales Utilization}}$$

For commodities with components not identified by market channel, substitute breakdown name for fresh/processing market and use the same procedure.

U.S. MYA Price Computations

The following procedure is used to compute the U.S. MYA Prices:

$$\text{Fresh Market MYA} = \frac{\text{Fresh Market Value For All States}}{\text{Fresh Market Utilization For All States}}$$

$$\text{Process Market MYA} = \frac{\text{Process Market Value For All States}}{\text{Process Market Utilization For All States}}$$

$$\text{"All" Sales MYA} = \frac{\text{Sales Value For All States}}{\text{Sales Utilization For All States}}$$

Marketing Seasons for Noncitrus Fruits ¹

Apples:

All South Atlantic States, plus AR, CA, IL, IN, KY, MO, NM, TN June - May
 OR, WA August - July
 All other States July - June

Apricots:

Fresh Fruit May 25 - August 20
 Canning June 15 - August 15
 Dried (CA) June 20 - August 20

Avocados:

CA November 1 through November 30 the following year
 FL June 20 - February 28
 HI January 1 - December 31 (peak harvest March 1 - April 30)

Bananas: January 1 - December 31

Cherries, Sweet: May 1 - August 15

Cherries, Tart: June 15 - August 20

Cranberries: September 5 - December 20

Dates: August 15 - March 15

Figs:

Fresh Fruit June 5 - October 31
 Canning August 1 - October 15
 Dried (CA) June 20 - October 31

Grapes:

Fresh (CA) May 25 - April 30
 Fresh (AZ) June 5 - July 15
 Fresh (All other States) July 10 - October 31
 Crushed for Juice, Wine, or Brandy August 1 - December 15
 Dried for Raisins (CA) September 1 - May 31

Guavas: January 1 - December 31 (peak harvest September 1 - October 31)

Kiwifruit: November 1 - April 30

Nectarines: June 10 - August 31

¹See footnote on next page.

Marketing Seasons for Noncitrus Fruits ¹ (continued)

Olives: September 25 - March 15

Papayas: January 1 - December 31

Peaches:

Fresh (GA and SC) May 20 - August 31
Fresh (Other South Atlantic States, South Central States, CA) .. June 1 - September 30
Fresh (New England States, ID, MI, NY) August 1 - September 30
Fresh (All other States) July 1 - September 30
Canning (CA) July 1 - September 10
Dried (CA) August 1 - October 10

Pears:

Fresh (CA) July 1 - April 30
Fresh (WA and OR) August 10 - May 31
Fresh (Other States) July 1 - December 15
Canning and Dried (CA, OR, WA) August 1 - November 30

Pineapples: January 1 - December 31 (peak harvest March 1 - July 31)

Plums:

Fresh (CA) May 25 - September 30
Canning (CA) June 1 - September 30

Prunes, Dried (CA): August 1 - April 30

Prune and Plums:

Fresh and Canning (ID, MI, OR, WA) August 10 - October 20

Marketing Seasons for Tree Nuts ¹

Almonds: August 5 - November 15

Hazelnuts (Filberts): October 1 - September 30

Macadamia Nuts: January 1 - December 31 (peak harvest August 1 - December 31)

Pecans: September 30 - March 15

Pistachios: September 1 - October 31

Walnuts: September 15 - December 31

¹For detail by States, see Agricultural Handbook No. 186, "Fruits and Tree Nuts, Blooming, Harvesting, and Marketing Dates", Dec 1975.

Information Contacts

Listed below are the commodity specialists in the Crops Branch of the National Agricultural Statistics Service to contact for additional information.

Mark Harris, Chief	(202) 720-2127

Biz Wallingsford - Processing Vegetables, Onions, Strawberries	(202) 720-2157

The next "Noncitrus Fruits and Nuts Summary" report will be released January 2002.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C., 20250-9410, or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: <http://www.usda.gov/nass/>. Select "Today's Reports" or Publications and then Reports by Calendar or Publications and then Search, by Title or Subject.

E-MAIL SUBSCRIPTION

There are two options for subscribing via e-mail. All NASS reports are available by subscription free of charge direct to your e-mail address. 1) Starting with the NASS Home Page at <http://www.usda.gov/nass/>, click on **Publications**, then click on the **Subscribe by E-mail** button which takes you to the page describing e-mail delivery of reports. Finally, click on **Go to the Subscription Page** and follow the instructions. 2) If you do NOT have Internet access, send an e-mail message to: usda-reports@usda.mannlib.cornell.edu. In the body of the message type the word: **list**.

AUTOFAX ACCESS

NASSFax service is available for some reports from your fax machine. Please call 202-720-2000, using the handset attached to your fax. Respond to the voice prompts. Document 0411 is a list of available reports.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-834-0125 FAX: 703-834-0110
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at **800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.
