Price Reactions After USDA Crop Reports

March 2009
This report contains corn, soybean, wheat, and cotton price reactions to the USDA Crop Production and Grain Stocks reports. Each year, estimates of corn, soybean, wheat, and cotton production are published in the monthly Crop Production reports. Corn and soybean estimates are published in the August, September, October, and November Crop Production reports and the January Crop Production Annual Summary. Wheat estimates are published in the May, June, July, and August Crop Production reports, and the September Small Grains Annual Summary. Cotton estimates are included in the August, September, October, November, and December Crop Production reports and the January Crop Production Annual Summary. Estimates of corn, soybean, and wheat stocks are published in the Grain Stocks report issued in March, June, September, and January. This report does not imply that NASS reports are solely responsible for changes to the price level for commodities referenced in the publication. The price level for any commodity can potentially be affected by other information available to the market at that time but ultimately is determined by supply and demand.

The prices in this report for corn, soybeans, wheat, and cotton represent sales from producers to first buyers at major markets as reported by the USDA Agricultural Marketing Service (AMS). The price data series used for each commodity is described below:

<table>
<thead>
<tr>
<th>Commodity</th>
<th>AMS Market News Price Used</th>

</thead>
<tbody>
<tr>
<td>Corn</td>
<td>The closing cash price for Southern Iowa #2 yellow corn.</td>
</tr>
<tr>
<td>Soybeans</td>
<td>The average price paid at Southern Iowa points by processors.</td>
</tr>
<tr>
<td>Wheat</td>
<td>The closing cash price for Kansas City #1 hard winter wheat (ordinary protein).</td>
</tr>
<tr>
<td>Cotton</td>
<td>The 7-Market Average Base Quotations for upland cotton (the upland cotton base quality is color 41, leaf grade 4, staple 34).</td>
</tr>
</tbody>
</table>

Before May 1994, the quarterly Grain Stocks report, the monthly Crop Production report, as well as the Annual Crop Production and Small Grains Summaries were all published at 3:00 p.m. ET. Therefore, the “prior closing price,” referred to in the tables of this report, is the closing price the day of the release since the U.S. markets were already closed at 3:00 p.m. ET and did not have a chance to react on that day. Referring to data in this publication, if a report was published on Thursday at 3:00 p.m. ET, the “prior closing price” is Thursday’s closing price. The “day after price” is the closing price on Friday and the “week after price” is the following Thursday’s closing price.

However, starting in May 1994, the release time for all reports mentioned previously was changed to 8:30 a.m. ET. Therefore, the “prior closing price,” referred to in the tables of this report, is the previous day’s closing price since the U.S. markets had not yet opened on the day of the release. The “day after” and “week after” prices are then published to reflect the same number of days after report publication as when the report was released at 3:00 p.m. ET. Referring again to data in this publication, if a report was published on Tuesday at 8:30 a.m. ET, the “prior closing price” is Monday’s closing price. The “day after price” is the closing price on Tuesday since the U.S. markets were open a full day after the report was released and the “week after price” is the following Monday’s closing price.
