WASHINGTON, D. C.

PEANUT STOCKS AND PROCESSING
SEASONAL REPORT, 1952-53

This report gives final revised monthly and seasonal data for the Peanut Stocks and Processing reports for the 1952-1953 season and in some cases revised monthly data for end-of-month stocks for the 1951-52 season where such revisions were found to be necessary.

According to the Peanut Statistics Act under which these statistics are collected, all shellers, crushers and processors are required to submit monthly reports of their operations and in most instances the published preliminary monthly reports are based on a complete enumeration of all shellers and crushers and most of the large processors of raw peanuts. However, due to the large number of processors of raw peanuts there are always a few firms in this category whose reports are not received in time to be included in the first tabulation for that month. Also, there are occasionally some unintentional errors in reports received from shellers, crushers, or processors which cannot be corrected until after the current month's report is released.

This is the principal reason why all statistics for the current month, as published in the Peanut Stocks and Processing Report, are designated as preliminary.

All possible corrections are made during the following month, and these corrections, together with late reports, are included in the revised totals for the month as published in the next report. In most cases, this tabulation will stand as the final report for that particular month. Such corrections as cannot be made in time for the second report are included in the seasonal reports.
