## PEANUT STOCKS AND PROCESSING

This report gives final monthly and seasonal data for the Peanut Stocks and Processing reports for the 1967-68 and 1966-67 seasons. Because further revisions for the 1966-67 season are contained in this publication, seasonal reports for the August 1966 - July 1967 season issued in October 1967 should be destroyed.

According to the Peanut Statistics Act, under which these statistics are collected, all shellers, crushers, warehousemen, and processors handling raw peanuts are required to submit monthly reports of their operations. In most instances the published preliminary monthly reports are based on a complete enumeration of these commercial facilities. However, due to the large number of handlers of raw peanuts, there are occasionally a few late reports or corrections to be included after the preliminary monthly tabulations.

Data on inventories and millings of "farmers' stock" peanuts are in terms of "net weight." Stocks of total shelled peanuts (shelled edibles plus oil stock) are converted to an equivalent farmers' stock basis by a factor of 1.33, which is designed to reflect the average total kernel content on a net weight basis. No adjustment is used for converting cleaned in shell peanuts (roasting stock) to an equivalent farmers' stock basis since data as reported are essentially on a net weight basis.

Table 1.--Stocks of peanuts on hand at month's end 1/

1/ Excludes stocks on farms, but includes stocks owned by CCC and stocks held by cooperative associations on which CCC has advanced loans. Farmers' stocks are on a net weight basis.

2/ Includes shelled edibles and shelled oil stock.

3/ Roasting stock.

4/ Actual farmers' stock x 1.00, shelled peanuts x 1.33, and cleaned in shell x 1.00 equals total farmers' stock equivalent.

\* Revised after October 1967.
