Carryover Stocks 1 Percent Below Last Season

End of season commercial peanut stocks on July 31 of 352 million pounds were 1 percent below last season's carryover of 357 million pounds.

July 31 stocks included 3 million pounds of actual farmers' stock, shelled peanuts equal to 333 million pounds of farmers' stocks, and 16 million pounds of roasting stock.

End of season stocks of shelled peanuts totaled 250 million pounds (actual weight)--238 million of edible grades and nearly 13 million pounds of shelled oil stock. Shelled edibles consisted of 105 million pounds of Virginias, over 65 million Runners, and 67 million Spanish.

Millings For Season Slightly Below A Year Ago

Millings for the 1969-70 season (excluding seed) of 2,270 million pounds were only 5 million pounds, less than last season's millings of 2,275 million pounds. Millings for the season by types were: Virginias, 766 million pounds--up 9 percent; Runners, 497 million pounds--down 15 percent; and Spanish, 1,007 million pounds--up nearly 2 percent. July millings of 16 million pounds were nearly 25 million pounds below July 1969.

Edible Useage For Season Up 3 Percent--Crushings Down 11 Percent

Commercial processors during the 1969-70 season used a total of 1,062 million pounds of raw shelled peanuts in the production of specified edible products (excluding oil). This was an increase of 3 percent over last season's total edible useage of 1,032 million pounds. Uses during July of 77 million pounds compares with 80 million pounds in July 1969.

Crushings for the 1969-70 season totaled 437 million pounds--11 percent below last season. Crushings of 25 million pounds in July were 24 percent below July 1969.

Peanut butter deliveries during July 1970, under the Government Food Distribution Program for needy families, totaled 2,653,920 pounds about 3 percent more than July last year.
