The 1962 pig crop totaled 94,244,000 head, an increase of 1 percent from last year, according to the Crop Reporting Board. The December 1961-May 1962 pig crop of 49.7 million head was 1 percent less than the 1961 crop of 50.4 million head. The June-November 1962 pig crop of 44.5 million head was 5 percent more than the 1961 crop of 42.6 million head. The decline in the number of December-May pigs resulted largely from a lower average size of litters than in 1961. The increased number of June-November pigs resulted from 4 percent more sows and 1 percent larger litters. The average of 7.23 pigs per litter is the highest of record.

For the December 1962-May 1963 period, reports based on farmers' intentions indicate 7.2 million sows to farrow, or 3 percent more than the 7.0 million sows farrowed during the same period a year earlier. If these intentions materialize, and the number of pigs per litter equals the average plus an allowance for trend, the December 1962-May 1963 pig crop would be 51.5 million head, 4 percent more than the 1962 crop.

This report is based on a survey of 177,000 farm and ranch operators. These returns were obtained largely through the assistance of the Post Office Department and rural mail carriers.

1/ As indicated by breeding intentions reports.
2/ Average number of pigs per litter with allowance for trend used to compute indicated number of Dec.-May pigs. Number rounded to nearest 500,000 head.

MtAn 4 (12-62)
U. S. Department of Agriculture
Washington, D. C.
June-November period of 1962 is estimated at 44,543,000 head. This is nearly 5 percent more than the 1961 crop and 19 percent above the 1951-60 average for these months. All regions showed increases from last year with the North Central States showing the greatest gain. East North Central States and West North Central States were up 5 and 6 percent, respectively. Increases in other regions were: North Atlantic States and South Atlantic States, each 3 percent; South Central States, 1 percent; Western States, less than 1 percent.

Sows farrowing during June-November 1962 totaled 6,165,000 head, 4 percent more than farrowed a year earlier and 14 percent above average. June-November farrowings were 2 percentage points more than indicated by farmers' intentions reported last June. June-November farrowings in 1962 as a percent of 1961 and intentions reported last June by regions, are as follows: North Atlantic, 101 and 98 percent; East North Central, 104 and 103; West North Central 105 and 103; South Atlantic, 102 and 99; South Central, 99 and 97; Western 99 and 100.

Pigs saved per litter averaged 7.23 in the June-November period of 1962, which was a record high and compared with 7.16 in 1961 and 7.17 the previous record for these months in 1958. Litter size showed an increase over the previous June-November period in all regions.

Compared with a year earlier, farrowings during July, August, September, October, and November increased slightly, with June showing a small decrease. Percentages of sows farrowing by months during the June-November period of 1962 compared with 1961 are as follows: June, 15.2 and 15.9; July, 14.7 and 15.1; August, 21.6 and 21.1; September, 25.6 and 24.9; October 15.0 and 15.2; November, 7.9 and .7.8.

DECEMBER 1961-MAY 1962 PIG CROP--DOWN 1 PERCENT: The December 1961-May 1962 pig crop is estimated at 49,701,000 pigs, 1 percent less than a year earlier. A total of 7,020,000 sows farrowed during this period, practically unchanged from the 7,029,000 farrowed during the same period a year earlier; but 10 percent less than the 1951-60 average. Pigs saved per litter averaged 7.08, compared with 7.18 in the 1961 period and the 10-year average of 6.88.

ANNUAL PIG CROP UP 1 PERCENT: The combined pig crops for the period of December 1961-November 1962 totaled 94,244,000 head, 1 percent more than the 93,035,000 in 1961 and 4 percent more than the 1951-60 average of 90,799,000 head.
breeding intentions for the December 1962-May 1963 period indicate 7,225,000 sows to farrow -- 3 percent more than a year earlier. The 1951-60 average was 7,777,000 sows. The North Central and South Atlantic States indicate increases, while the North Atlantic, South Central, and Western States plan decreases. By regions, increases from 1962 are indicated as follows: South Atlantic and East North Central each up 4 percent, and the West North Central up 3 percent. Decreases are North Atlantic and South Central each down 1 percent, and the Western States down 6 percent.

If intentions for spring farrowings materialize and the number of pigs saved per litter equals the average with an allowance for trend, the 1963 spring pig crop would be 4 percent larger than a year earlier.

JUNE-NOVEMBER FARROWINGS INCREASED IN TEN SELECTED CORN BELT STATES; DECEMBER - MAY INTENTIONS ALSO UP:

For 10 selected Corn Belt States, June-November litters in 1962 and expected farrowings December 1962-May 1963 both show 4 percent gains from a year earlier. In these States -- Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, South Dakota, Nebraska, and Kansas -- the number of sows that farrowed during the June-November 1962 period totaled 4,661,000, an increase of 200,000 sows or 4 percent over 1961. Farmers' report intentions to farrow 5,630,000 litters during the six month period December 1962-May 1963. This is a gain of 199,000 litters or 4 percent over the same period a year earlier. All of the ten States show increases in both the June-November farrowings and the expected December-May farrowings.

Farrowings by quarters for these 10 Corn Belt States show that the 2,376,000 litters for the June-August period were up 3 percent while the September-November farrowings at 2,285,000 were 6 percent above a year earlier. Expected farrowings of 1,877,000 for December 1962-February 1963 are 2 percent above a year earlier and the March-May total of 3,753,000 is up 4 percent.
HOGS ON FARMS IN 10 STATES UP 3 PERCENT: The number of all hogs and pigs on farms in the 10 Selected Corn Belt States on December 1, 1962 totaled 48,849,000 head, up 3 percent from a year earlier. For individual States, percentage increases from a year earlier ranged from 2 percent in Iowa, Nebraska, Wisconsin to 6 percent in Missouri and Kansas.

Age classification of hogs and pigs on hand shows 16,513,000 under 3 months; 16,124,000 head 3 to 6 months of age; and 16,257,000 hogs over 6 months of age. As a percent of the total hogs and pigs, 33.8 percent were under 3 months old; 33.0 percent were in the 3 to 6 month age group; and 33.2 percent were over 6 months old. Compared with a year earlier, the under 3 months group was up 7 percent; the 3-6 months group was up 5 percent; while the number in the over 6 months age group was down 2 percent.
