## POTATO STOCKS UP 16 PERCENT

POTATO STOCKS on January 1, 1986 totaled 201 million cwt, up 16 percent from last year and 22 percent above two years ago. The January 1 stocks averaged 59 percent of fall production this season compared with a 57 percent share last year. Losses are also up sharply, running 32 percent higher than last year. Russets made up 77 percent of the stocks; while whites covered 20 percent and reds 3 percent.

 \* NOTE: Stocks are defined as the quantity remaining in storage for all\*  
 \* purposes and uses, including shrinkage and waste and other \*  
 \* losses that occur after the date of each report. Sales of fall\*  
 \* potatoes for all purposes generally account for about 90 per- \*  
 \* cent of the total fall production. Shrinkage, loss and home \*  
 \* use account for the remaining 10 percent. However, this year \*  
 \* losses are running much higher than normal. \*

#### RELIABILITY OF JANUARY 1 STOCKS ESTIMATES

The "Root Mean Square Error" for the January 1 stocks estimate is 2.4 percent. This means that the chances are 2 out of 3 that the current estimate of 201 million cwt will not be above or below the final estimate by more than 2.4 percent or approximately 4.8 million cwt. Chances are 9 out of 10 (90 percent confidence level) that the difference will not exceed 4.1 percent or approximately 8.3 million cwt.

The 10-year (1976-85) record of the differences between the January 1 stocks estimate and the final estimates averaged 4.02 million cwt, ranging from .52 million to 5.94 million cwt. During this 10-year period, the January 1 estimate has been below the final estimate 9 out of 10 years.

Potato stocks in the 3 EASTERN STATES totaled 26.8 million cwt, 22 percent greater than the last two years. Maine stocks of 19.8 million cwt are up 32 percent; Pennsylvania cellars, at 3.35 million cwt, gained 8 percent; but New York areas, combining for 3.65 million cwt, dropped 4 percent from a year ago.

In the 6 CENTRAL STATES, January 1 potato stocks totaled 45.5 million cwt, up 12 percent from last year and 27 percent above two years ago. Nearly all of the increased stocks over last year are held in North Dakota and Wisconsin; up 24 and 20 percent, respectively.

The 6 WESTERN STATES stored a total of 129 million cwt of potatoes on January 1, 1986, up 17 percent from last year and 20 percent above two years ago. Idaho stocks of 65.0 million cwt are up 19 percent from last year. However, remaining stocks carry an estimated 12 percent that will be unmarketable due to frost damage. Washington, at 30.0 million cwt is up 16 percent; Oregon storage of 15.7 million cwt is up 22 percent; and Colorado stocks at 12.9 million cwt are up 18 percent. California and Montana carried fewer potatoes in storage than last year.

DISAPPEARANCE from harvest to January 1 totaled a record 139 million cwt compared with 130 million cwt moved last year. Cullage, loss, and shrinkage, pushed by heavy frost damage during harvest in Idaho and Montana, totaled 24.9 million cwt this season compared with 18.9 million cwt last year.

Cumulative PROCESSING in the 8 major processing States totaled 59.6 million cwt of potatoes this year compared with 58.9 million last year. During December, processors took in 11.5 million cwt, 2 percent fewer than a year earlier.
