

Potato Stocks

ISSN: 1949-1565

Released February 17, 2015, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

Potato Stocks Down Slightly From February 2013

The 13 major potato States held 204 million cwt of potatoes in storage February 1, 2015, down slightly from 2 years ago. Potatoes in storage accounted for 51 percent of the 2014 fall storage States' production, 1 percent higher than 2 years earlier. Potato disappearance, at 198 million cwt, was down 4 percent from February 1, 2013. Season-to-date shrink and loss, at 18.2 million cwt, was 4 percent lower than two years ago. Processors in the 9 major States used 106 million cwt of potatoes for the season, up 2 percent from February 2014.

Fall Potato Production and Stocks – 13 Major States: February 1, 2014-2015

[Stocks include processor holdings and most of the seed to plant following year's crop. Seed usage for all seasons in 2013 totaled 25.6 million cwt]

¹ Includes Maine grown potatoes only. Amounts exclude quantities used for potato chips.

² Colorado, Minnesota, Nevada, North Dakota, and Wisconsin. Monthly amounts exclude quantities used for potato chips in Wisconsin.

³ Dehydrated products except starch and flour. Includes Colorado, Idaho, Nevada, Oregon, Washington, and Wisconsin.

Statistical Methodology

Survey Procedures: Potato stocks surveys are conducted in 13 major fall potato producing States, which account for 90 percent of the United States all potato production. Growers, processors, and storage facilities are contacted during the months of December, February, April and June to obtain the quantity of potatoes stored as of the first of the month, as well as shrinkage and loss information. Processing data is collected in nine States (Colorado, Idaho, Maine, Minnesota, Nevada, North Dakota, Oregon, Washington, and Wisconsin).

Estimating Procedures: Information obtained from the potato stocks surveys along with federal administrative data is used to establish estimates of stocks, shrinkage and loss, and processing usage. These estimates are reviewed for errors, reasonableness, and consistency with historical estimates.

Revision Policy: Stocks, processing, and shrinkage and loss estimates for the previous estimating period are subject to revision based on late and/or updated information. At the end of the marketing season, all information available, including disposition data, will be thoroughly reviewed and any necessary revisions for the entire crop year will be published in the Potatoes Annual Summary.

Reliability: Survey indications are subject to sampling variability because all operations holding potato stocks are not included in the sample. Survey results are also subject to non-sampling errors such as omission, duplication, imputation for missing data, and mistakes in reporting, recording, and processing the data. These errors cannot be measured directly, but they are minimized through rigid quality controls in the data collection process and a careful review of all reported data for consistency and reasonableness.

To assist users in evaluating the reliability of the February 1 stocks estimate, the "Root Mean Square Error", a statistical measure based on past performance, is computed. The deviation between the February 1 stocks estimate and the final estimate is expressed as a percentage of the final estimate. The average of squared percentage deviations for the latest 20 year period is computed. The square root of the average becomes statistically the "Root Mean Square Error". Probability statements can be made concerning expected differences in the current estimate relative to the final end-of-season estimate, assuming that factors affecting this year's estimate are not different from those influencing recent years.

The "Root Mean Square Error" for the February 1 stocks estimate is 2.4 percent. This means that chances are 2 out of 3 that the current estimate of 204 million cwt will not be above or below the final estimate by more than 2.4 percent. Chances are 9 out of 10 (90 percent confidence level) that the difference will not exceed 4.1 percent.

Changes between the February 1 stocks estimates and the final estimates during the past 20 years have averaged 3.55 million cwt, ranging from 100,000 cwt to 9.66 million cwt. During the 20 year period, the February 1 estimate has been below the final estimate 12 times, and above 7 times.

Fall Potato Preliminary and Final February 1 Stocks – United States: 2004-2014 Crop Years

Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: <http://www.nass.usda.gov>
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit <http://www.nass.usda.gov> and in the “Follow NASS” box under “Receive reports by Email,” click on “National” or “State” to select the reports you would like to receive.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the [USDA Program Discrimination Complaint Form](#) (PDF), found online at http://www.ascr.usda.gov/complaint_filing_cust.html, or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at program.intake@usda.gov.

USDA 2015 Agricultural Outlook Forum

Smart Agriculture in the 21st Century

Crystal Gateway Marriott Hotel

Arlington, VA

Feb. 19-20, 2015

SAVE the Date!

The USDA Outlook Forum, first held in 1923, brings together renowned speakers including farmers, ranchers, economists, academics, statisticians, consultants, industry leaders, and government policymakers. The Secretary of Agriculture will present the keynote address, followed by a distinguished guest speaker. The economic outlook for the coming year will be presented by the USDA Chief Economist. In addition, a plenary panel of industry leaders will discuss an important topic relevant to agriculture.

- **February 19** includes a morning plenary, a networking luncheon, five concurrent afternoon sessions, and a dinner speaker.
- **February 20** includes a day of 5 concurrent sessions and luncheon speakers.

Session Topics are expected to include:

- Perspectives on Global & U.S. Trade
- Tomorrow's Opportunities
- Big Data
- Commodity Situation and Outlook
- Food Price & Farm Income Outlook
- Conservation & Regulation
- Water Issues
- Weather, Drought & Big Data
- Climate Change
- Moving Feed, Food & Fuel to Market
- 100-Year Anniversary of USDA Market News
- Nutrition & New Opportunities for Producers
- Regional Approaches to Rural Growth
- Bio-Economy
- Antimicrobial Resistance
- Agriculture & Bees
- Local Foods
- Food Waste

Register in November at: www.usda.gov/oce/forum
