

# Poultry Slaughter

United States  
Department of  
Agriculture

Washington, D.C.

---

Released April 4, 1994, by the Agricultural Statistics Board. This summary relates to preliminary inspection totals for February 1994, updated January 1994 totals, and 1993 monthly revisions.

## Ready-to-Cook Weight Up 5 Percent

Poultry Certified Wholesome during February (ready-to-cook weight), totaled 2.14 billion pounds, up 5 percent from the amount certified in 1993. Updated totals for January 1994 show that 2.28 billion pounds were certified. The January through February cumulative total of pounds certified, at 4.42 billion pounds, was up 4 percent from the same period the previous year.

The preliminary total Live Weight of Poultry Inspected during February 1994 was 2.93 billion pounds. Inspections included 2.42 billion pounds of young chickens, 64.8 million pounds of mature chickens, 436 million pounds of turkeys, and 11.2 million pounds of ducks.

Ante-mortem condemnations during February 1994 totaled 12.4 million pounds. Condemnations were 0.42 percent of the live weight inspected, compared with 0.36 percent a year earlier. Post-mortem condemnations, at 49.3 million pounds (N.Y. dressed weight), were 1.87 percent of quantities inspected, compared with 1.79 percent a year earlier.

February 1994 contained 20 weekdays (including one holiday) and four Saturdays, the same as February 1993. Each weekday represents approximately 5 percent of the month's total.

## 1993 Poultry Slaughter Up 4 Percent

Poultry Certified Wholesome under Federal Inspection during 1993 (ready-to-cook weight) totaled 27.6 billion pounds, up 4 percent from the total amount certified during 1992. Young chickens, at 22.2 billion pounds, accounted for 80 percent of the total pounds certified ready-to-cook and were up 5 percent from 1992. Total turkeys, at 4.85 billion pounds, represented 18 percent of the overall total and were virtually unchanged from the previous year. The remaining 2 percent were mature chickens, ducks, and other poultry. Average live weight for young chickens increased 1 percent to 4.56 pounds, while total turkeys average live weight increased 2 percent to 22.2 pounds per bird.

## Poultry Slaughter Estimates

**Data Sources:** Primary data for commercial poultry slaughter estimates are obtained from the Poultry Inspection Form (FSIS 6000-21) completed by inspectors of the Food Safety and Inspection Service (FSIS), USDA. This form provides actual counts of birds slaughtered in Federally Inspected (FI) plants. Over 99 percent of the total U.S. slaughter for any species is under FI. The FSIS 6000-21 forms collect number of head slaughtered daily under FI by species and class as well as condemnations and total live and dressed weights. Approximately 350 plants in the U.S. are operated under Federal Inspection. Annual totals of poultry slaughtered under State-administered Non-Federal Inspection (NFI) are published in the April release.

**Revision Policy:** Revisions are generally the result of late reports received by FSIS from plants and are usually less than one-half of 1 percent of the preliminary totals. Revisions for the previous month and year-to-date totals are published in each monthly release. Final data are published in the annual summary released in April and reflect any late reports or corrections which occurred after the monthly revision were published.

**Procedures and Reliability:** Plant inspectors submit forms (FSIS 6000-21) weekly summarizing the plant's activity. When inconsistencies in the data are detected, the reports are returned to the inspectors for correction. Inspectors correct or validate the report and resubmit it. The reports cover weekly activities through Saturday night and reported data are allocated to the appropriate month as it enters the database.

A NASS computer program provides a review of current data with historical data for each plant. An edit provides checks for the detection of errors such as invalid plant information, duplication, and erroneous data. The program also generates a missing reports listing for a telephone follow-up. Data are summarized weekly and accumulated to a monthly total for this release.

Major slaughter plants with missing reports are adjusted prior to publication to assure that all plants slaughtering a significant portion of a specific class are accounted for each week. Estimates for missing weeks are made only after verifying that the plant was in operation. Adjustments are based on either the previous week's information or a week determined to be similar to the one missing. Late reports replace imputed data as they become available. While there will continue to be a varying degree of incompleteness from month to month, it is expected to have only a minimal impact on the final totals.

Poultry slaughter estimates are based on a census of operating plants and, therefore, have no sampling error. However, they may be subject to errors such as omissions, duplications, and mistakes in reporting, recording, and processing the data. These errors are minimized through strict quality controls in the edit and summarization process, and a careful review of all reported data for consistency and reasonableness.

Generally, no State data are published if less than three plants operate for a species in a State, or if one plant has 60 percent or more of the total head for that species. These data are included in the U.S. totals.

This issue of "Poultry Slaughter" also contains revised monthly data on selected items for 1993. These revisions are shown on pages 15 through 24.

## Definitions Used To Report Federally Inspected Slaughter

**Ante-Mortem Condemnations** - Birds condemned prior to their entry into the slaughter plant.

**Certified Ready-to-Cook** - The weight of poultry certified wholesome by inspection after post-mortem condemnation pounds are removed. Ready-to-cook represents poultry meat ready for the marketing channel.

**Ducks** - Includes all ducks regardless of age and weight.

**Fryer-Roaster Turkeys** - Young immature birds, usually under 16 weeks of age.

**Mature Chickens** - Fowl from breeder and market egg flocks and stags and cocks.

**New York Dressed Weight** - Carcass weight after only feathers and blood are removed. This weight is approximately 90% of live weight.

**Old Turkeys (Breeders)** - Fully matured birds held for egg production, usually over 15 months of age.

**Other Poultry** - Includes all other ready-to-cook products which bear the U.S.D.A. Inspected for Wholesomeness legend.

**Post-Mortem Condemnations** - Carcasses or parts condemned by the inspector because of disease or mishandling and removed from the slaughter line and destroyed.

**Young Chickens** - Commercially grown broilers-fryers and other young immature birds such as roasters and capons.

**Young Turkeys (Mature)** - Young birds grown to a matured market age, about 5 months.
