Released September 5, 1991, by the Agricultural Statistics Board. This summary relates to preliminary inspection totals for July and updated June totals.

Ready-to-Cook Weight Inspected up 10 Percent

Poultry Certified Wholesome during July (ready-to-cook) weight, totaled 2.16 billion pounds, 10 percent above the amount certified in 1990. Updated totals for June 1991 show that 2.01 billion pounds were certified.

July 1991 contained 23 weekdays (including one holiday) and four Saturdays, one more weekday than, July 1990. Each weekday represents approximately 5 percent of the month's total.

The preliminary total Live Weight of Poultry Inspected during July 1991 was 2.93 billion pounds. Inspections included 2.34 billion pounds of young chickens, 68.5 million pounds of mature chickens, 509 million pounds of turkeys and 11.2 million pounds of ducks.

Ante-Mortem Condemnations during July 1991 totaled 15.3 million pounds. Condemnations were 0.52 percent of the live weight inspected, compared with 0.42 percent a year earlier.

Post-Mortem condemnations, at 48.2 million pounds (N.Y.Dressed Weight), were 1.83 percent of quantities inspected compared with 1.85 percent a year earlier.

Note: Tables unavailable for last months publication are shown on pages 9, 10 and 11 of this report. For information, call Ronald Sitzman (202) 447-3244. Office hours are 8:00 a.m. to 4:30 p.m. ET.

Data Sources: Primary data for the commercial poultry slaughter data are obtained from the Poultry Inspection Form (FSIS 6000-21) completed by Inspectors from the Food, Safety and Inspection Service (FSIS), USDA, which provide actual counts of birds slaughtered in Federally Inspected (FI) plants. Over 99 percent of the total U.S. slaughter for any species is under FI. The FSIS 6000-21 forms collect number of head slaughtered daily under FI by species and class as well as condemnations and total live and dressed weights. Approximately 350 plants in the U.S. are operated under Federal Inspection.

Update Policy: Updated data are generally the result of late reports received. Updates for the previous month and the year-to-date totals are noted in each monthly release and are usually within 1 1/2 percent of the preliminary totals. Final data are generally published in the May report.

Procedures: Plant inspectors submit weekly forms (FSIS 6000-21) summarizing the plants activity. When inconsistencies in the data are detected, the reports are returned to the inspectors for correction. Inspectors correct or validate the report and resubmit it. The reports cover weekly activities through Saturday night. The reported data is allocated to the appropriate month as it enters the database.

Each month the data are summarized by FSIS into the form published by NASS in the Poultry Slaughter report. The summary includes all data available at that time. No allowances are made for missing reports. The degree of incompleteness can vary from month to month.

Generally, no State data are published if less than three plants operate for a species in a State, or if one plant has 60 percent or more of the total head for that species. These data are included in the U.S. totals.

Annually, monthly summaries are rerun for the calendar year and tables are published in the May Poultry Slaughter report showing recap data by month for selected items.

*The following tables were scheduled for the August 1, 1991 release but were *
*unavailable at that time. *
