HIGHLIGHTS

CORN growers intend to plant 73.3 million acres in 1989, up 8 percent from last year.

SOYBEAN planting intentions, at 61.7 million acres, are 5 percent above 1988.

SORGHUM producers intend to plant 11.8 million acres this year, up 14 percent from 1988.

BARLEY producers intend to plant 9.62 million acres in 1989, down 1 percent from last year.

OAT producers intend to plant 13.2 million acres this year, down 5 percent from 1988.

HAY producers plan to harvest 63.1 million acres this year, 4 percent fewer than last year but 4 percent more than 2 years ago.

ALL COTTON prospective plantings for 1989 total 11.0 million acres, down 12 percent from 1988 planted acres.

WINTER WHEAT seeded acres are estimated at 54.7 million acres, up 12 percent from last year.

DURUM WHEAT acreage is expected to total 3.86 million acres, up 16 percent and the highest level since 1982.

OTHER SPRING WHEAT growers plan to seed 15.7 million acres, up 17 percent; also the largest area since 1982.

ALL RICE intended acreage for 1989 is 2.86 million acres, 2 percent below 1988.

PEANUT planting intentions total 1.64 million acres for 1989, down 1 percent from 1988.

TOBACCO growers expect to harvest 713 thousand acres of all classes and types in 1989. This exceeds 1988 by 13 percent and is 21 percent greater than 1987.

DRY EDIBLE BEAN intentions call for 1.67 million planted acres in 1989, up 11 percent from last year but 7 percent below two years ago.

SWEETPOTATO growers expect to plant 94.0 thousand acres this year, up 2 percent from last year but 3 percent below 1987.

* SEE NOTICE ON PAGE A-3. *

PROSPECTIVE ACREAGE OF OILSEEDS,
FOOD AND FEED GRAINS INCREASE

Oilseed acreage (soybeans, cotton, peanuts, sunflower, and flaxseed) is expected to total 76.8 million acres, up 2 percent from last year. Area planted to food grains (wheat, rice, and rye) at 79.4 million acres, is up 12 percent from 1988. The intended 1989 feed grains acreage (corn, oats, barley, and sorghum) of 108 million acres is up 6 percent from last year.

1/ INTENDED PLANTINGS IN 1989 AS INDICATED BY REPORTS FROM FARMERS.
2/ AREA HARVESTED.

The CROP PRODUCTION report contains State and National estimates with related information on selected agricultural commodities. These data were prepared and adopted by the Agricultural Statistics Board which consists of commodity statisticians from the field offices and Washington headquarters.

1/ INTENDED PLANTINGS IN 1989 AS INDICATED BY REPORTS FROM FARMERS.
2/ AREA HARVESTED.

* NOTICE *

* This report is based on voluntary responses from approximately 65,000 *
* farmers and ranchers. The National Agricultural Statistics Service col- *
* lected these acreage data as part of the Agency's quarterly agricultural *
* surveys. Data included in this survey were collected between March 1 *
* and March 15. *
* *
* The report is intended to assist producers in formulating their acreage *
* plans for 1989. Actual acreage planted may vary from intentions because *
* of the effects of weather, availability of production inputs, changes in *
* market conditions prior to planting, and the indications from this re- *
* port. Data users are reminded that this report includes intentions to *
* plant for all purposes. For example, a considerable portion of Govern- *
* ment reserve acres is seeded to oats as a cover crop; therefore, the *
* change in planting intentions does not necessarily imply oats acreage *
* harvested for grain will also change by a similar amount. *
* *
* * * * * * * * * * *
* *
* This report includes an updated winter wheat area seeded estimate for *
* the 1989 crop. The first winter wheat production forecast will be pub- *
* lished in "Crop Production" released May 11, 1989. *
* *
* * * * * * * * * * *
* *
* Requests for a subscription order form covering all available reports *
* should be directed to ERS/NASS, P.O. Box 1608, Rockville, MD. 20850 *
* or call 800-999-6779. *
* *
* This report and other statistical, economic, marketing and news reports *
* are available electronically as soon as possible following release *
* through USDA's EDI SERVICE. For more information, call or write: *
* Russell Forte, (202) 447-5505, OGPA, USDA, Washington, D.C. 20250. *
* *
* The next issue of this report will be published March 1990. *

1/ INCLUDES BINDER TYPES GROWN IN OHIO.
 2/ ESTIMATES DISCONTINUED IN 1989 BECAUSE OF LIMITED ACREAGE.

U.S. PLANTED ACRES CORN AND SOYBEANS

CORN: Farmers intend to plant 73.3 million acres of corn for all purposes in 1989, up 8 percent from last year, and up 11 percent from 1987.

Farmers in Illinois and Iowa are anticipating an increase of 1 million acres in each State. Minnesota acreage is expected to be up 600 thousand acres and Indiana growers intend to plant 450 thousand acres more than last year.

In the South, North Carolina farmers expect to increase acreage by 250 thousand acres. Kentucky farmers intend to plant the same acreage as last year. Texas farmers are anticipating a 150 thousand acre increase.

In the Northeast, New York farmers intend to increase corn acreage 110 thousand acres, while Pennsylvania farmers expect to plant the same acreage as last year. In the Western States, California and Colorado are expecting acreage decreases.

SORGHUM: Farmers intend to plant 11.8 million acres of sorghum for all purposes in 1989, up 14 percent from 1988. Most States show increased acreage over 1988. Planting progress has been good in Texas, nearing completion in the Valley and Coastal Bend areas.

OATS: Producers plan to seed 13.2 million acres to oats in 1989, down 5 percent from the 13.9 million acres seeded last year.

As with previous years, oats are used as a cover crop on some government program acres; therefore, a change in planting intentions does not necessarily imply that acres to be harvested for grain will also change by a similar amount.

Responding to the reduced set-aside acreage this year, oat seedings are down sharply in the Corn Belt States of Illinois, Iowa, and Indiana. Illinois and Indiana intended acreage declined 43 percent from 1988, while Iowa is down 24 percent.

Other major States' oat intentions and percentage change from 1988 are: Minnesota--1.70 million acres, unchanged; South Dakota--1.60 million acres, up 14 percent; Texas--1.10 million acres, unchanged; Wisconsin--1.00 million acres; down 5 percent.

BARLEY: Producers intend to plant 9.62 million acres of barley in 1989, down 1 percent from the 9.68 million acres planted last year. Growers in North Dakota expect to plant 2.80 million acres, 8 percent more than in 1988. Montana, with the second largest acreage, is down 6 percent to 1.70 million acres. Percentage changes from 1988 for other major producing States are as follows: Minnesota, down 4; Idaho, up 7; and South Dakota, no change.

ALL WHEAT: Area seeded for 1989 is expected to total 74.3 million acres. This is a 13 percent increase from 1988 plantings.

WINTER WHEAT: Total seedings for 1989 are now placed at 54.7 million acres, up 12 percent from last year. The current estimate is up slightly from the January Seedings report.

Crop conditions last winter were quite varied, but most notable, was severe dryness in the central Plains. Precipitation is needed for Kansas winter wheat. Oklahoma's crop was rated in fair condition as of March 1. Texas stands need moisture.

DURUM WHEAT: Seeded area is expected to total 3.86 million acres for 1989, up 16 percent from last year. This also is the most acreage since 1982. Arizona and California durum growers have seeded 49 percent more acreage than last year. Intentions are up 14 percent in the northern durum States.

OTHER SPRING WHEAT: Growers intend to seed 15.7 million acres this season. If realized, this would be a 17 percent increase from 1988, and the largest area since 1982. Intentions are up in all 4 of the major producing States (the Dakotas, Minnesota, and Montana) a collective 17 percent. Prospects in the Pacific Northwest are up 18 percent.

RICE: Rice acreage is expected to total 2.86 million acres in 1989. This represents a 2 percent decrease from the 2.93 million acres seeded in 1988. Acreage is expected to be down in all States except Louisiana and Missouri.

Long grain acreage is expected to total 2.20 million acres compared with 2.25 million planted in 1988. Area planted to medium grain is expected to total 608 thousand acres, down from the 635 thousand acres planted in 1988. Short grain acres is expected to total 56.0 thousand acres, up from the 46.0 thousand acres planted last year.

SOYBEANS: Growers intend to plant 61.7 million acres in 1989, 5 percent above last year and 6 percent higher than 1987.

The North Central Region plantings are expected to total 44.2 million acres, up 3 percent from 1988. All States in the region except Kansas are expecting acreage increases in 1989. Illinois is showing the largest jump, up 300 thousand acres. Iowa is up 150 thousand acres, Minnesota up 100 thousand, Missouri up 200 thousand, and Indiana up 150 thousand.

The South Central States planting intentions, at 11.9 million acres, are up 7 percent from 1988. Most States in the region are expecting increases from last year, with Arkansas, Mississippi, and Tennessee increasing 100 thousand acres each. Kentucky and Louisiana are up 170 and 200 thousand acres, respectively. Alabama and Texas are both up 60 thousand, while Oklahoma is showing no change.

Growers in the Middle and South Atlantic States intend to plant 5.63 million acres this year, 14 percent above 1988 plantings. Most States are up in the region, with North Carolina increasing 180 thousand acres. Georgia is up 270 thousand and South Carolina is up 150 thousand, while Virginia is unchanged.

FLAXSEED: Acreage intended to be planted in 1989 is 290 thousand acres, up 5 percent from 1988. Both North Dakota and South Dakota producers intend to plant more acreage than last year with increases of 5 percent and 25 percent expected, respectively. Minnesota growers intend to plant less flaxseed in 1989.

PEANUTS: Growers intend to plant 1.64 million acres in 1989, a 1 percent decrease from 1988.

In the Southeast (Alabama, Florida, Georgia, and South Carolina), growers intend to plant 1.02 million acres, down 1 percent from 1988. All of these States expect decreases, except Alabama, where a 5 percent increase is expected.

Southwest growers (New Mexico, Oklahoma, Texas) intend to plant 368 thousand acres. This is virtually the same as the previous year's planted acreage.

In the Virginia-North Carolina area, planting intentions are expected to total 247 thousand acres -- unchanged from 1988.

SUNFLOWER: Planting intentions for all purposes total 2.1 million acres in 1989, or 3 percent below 1988 plantings.

Oil-type planting intentions are down in North Dakota and Texas, up in South Dakota, and unchanged in Minnesota and Kansas. Non-oil variety plantings are up in all States except South Dakota and Kansas, where intentions are unchanged from 1988 plantings.

COTTON: Area planted to all cotton for 1989 is expected to total 11.0 million acres, down 12 percent from 1988 plantings, but 6 percent above the 1987 planted acreage. Upland plantings are expected to total 10.8 million acres, down 13 percent from 1988. Growers intend to plant a record high American-Pima acreage of 291 thousand acres, up 55 percent from the 1988 previous record high. The largest increases in American-Pima acreage are in Arizona (up 57.0 thousand acres), Texas (up 25.0 thousand), and California (up 18.2 thousand acres).

Upland growers in Texas and Oklahoma intend to plant 5.33 million acres, down 12 percent from 1988. Acreage is expected to decline 12 percent in Texas and 7 percent in Oklahoma. Seedbed preparation in Oklahoma is slightly ahead of normal and planting has begun in southern Texas.

Delta growers (Arkansas, Louisiana, Mississippi, Missouri, and Tennessee) intend to plant 3.09 million acres, down 10 percent from 1988. Acreage declines are expected in all of the Delta States.

Upland planted acreage in the Western States (Arizona, California, and New Mexico) is expected to total 1.40 million acres, down 21 percent from 1988. Intentions are below 1988 in all three States. Seedbed preparation continues in Arizona.

Southeastern growers (Alabama, Georgia, North Carolina, and South Carolina) intend to plant 900 thousand acres, down 10 percent from 1988. Planted acreage is expected to decline in all 4 States.

ALL HAY: Acreage of all hay harvested in 1989 is expected to be off 4 percent from last year. Farmer's report intentions to cut 63.1 million acres this year compared with 65.6 million in 1988 and 60.7 million acres in 1987.

States expecting to harvest less acreage than a year earlier include Iowa, down 1.40 million acres; Minnesota with a 1.10 million drop; Illinois off 500 thousand; Missouri with 400 thousand less; Nebraska with a 300 thousand decline; Indiana, 190 thousand acres below 1988; and Wisconsin with a 150 thousand decrease. In contrast, States expecting to harvest more acreage include Montana and Texas, each up 400 thousand acres; North Dakota and South Dakota, each with 200 thousand increases; New York, 190 thousand above 1988; and Wyoming, 160 thousand above last year.

DRY EDIBLE BEANS: U.S. dry bean growers intend to plant 1.67 million acres in 1989, up 11 percent from last year but 7 percent below 1987. Each of the 14 States estimating dry beans is at or above last year's acreage level.

North Dakota growers intend to plant 450 thousand acres, a gain of 13 percent; Michigan, at 280 thousand acres, would be up 8 percent; Nebraska expects 210 thousand acres, up 5 percent. Idaho, with 150 thousand acres expected, is up 25 percent and California, with 175 thousand acres, would be up 14 percent. Colorado growers intend to plant 160 thousand acres, the same as last year. Each of the 8 smaller producing States intend planting increases ranging from 70-80 percent in Utah and Montana to 3-5 percent in Washington and Kansas.

SWEETPOTATOES: Planted acreage of sweetpotatoes in 1989 should hit 94.0 thousand acres, according to grower's early March intentions. This is up 2 percent from last year but is 3 percent under 1987. Land preparation is in progress in Southern States where soils are dry enough. Slips are doing well in beds in preparation for general transplanting in April.

Maryland, Mississippi, and Texas anticipate smaller acreage than last year. Georgia, Louisiana, New Jersey, Tennessee, and Virginia expect acreage to stay the same as last year. Intentions in Alabama, California, and the Carolinas are up enough to tip U.S. acreage above last year.

TOBACCO: Growers intend to harvest 713 thousand acres of tobacco in 1989. If those plans materialize, the area harvested will exceed 1988 by 13 percent and will be 21 percent greater than 1987. In the 16 tobacco producing States, this year's area is expected to be up in 13, unchanged in 1, and down in 2 States.

Flue-cured growers plan to harvest 403 thousand acres of tobacco. This represents a 10 percent increase from last year and a 24 percent rise from 2 years ago. With this acreage, flue-cured tobacco will account for 56 percent of all tobacco acreage compared with 58 percent a year earlier. North Carolina, with 267 thousand acres, has nearly two-thirds of the flue-cured area as it did last year.

Burley tobacco producers are expecting to harvest 265 thousand acres, 19 percent more than in 1988 and 23 percent above the 1987 area harvested. This year's burley acreage accounts for 37 percent of the expected all tobacco acreage compared with 35 percent last year. Kentucky, with two-thirds of the burley area to be harvested, is up 23 percent from a year ago.

Acreage of Maryland type tobacco, at 13.0 thousand acres, is anticipated to decline 4 percent from last year and to be 17 percent under 2 years ago. Dark fire-cured types are estimated at 16.1 thousand acres, up 18 percent from 1988 and 16 percent above 1987. Dark air-cured tobacco growers expect to harvest 4,340 acres compared with 3,790 last year and 3,610 acres in 1987.

The prospective acreage of all cigar type tobaccos, at 12.2 thousand acres, is up 7 percent from 1988 but down 10 percent from 1987. Compared with last year, cigar filler acreage is unchanged, cigar binder is up 17 percent and cigar wrapper is expected to increase 8 percent.

SUGARBEETS: Growers expect to plant 1.33 million acres of sugarbeets in 13 States in 1989. If intentions are realized, planted acreage will be virtually unchanged from a year earlier.

Intentions in the 5 leading States are: Minnesota, 340 thousand acres, nearly the same as 1988; California, 200 thousand acres, down 7 percent; North Dakota, 170 thousand acres, off 4 percent; Idaho, 171 thousand acres, 2 percent higher; and Michigan, 153 thousand acres, 1 percent above last year.

Flooded fields from recent rains and early snow melt caused some uncertainty of planted acreage in California. Below average snow pack and reservoir levels are causing Wyoming growers concern over irrigation water supplies.
