

# Trout Production

---

Released February 26, 2008, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Trout Production* call Toby Paterson at (202) 720-0585, office hours 7:30 a.m. to 4:00 p.m. ET.

## Trout Value of Sales Increased 9 Percent from 2006

The total value of fish sales received by trout growers in the United States totaled 87.5 million dollars for 2007, an increase of 9 percent from 2006. Idaho accounted for 53 percent of the total value of fish sold.

The number of **trout 12 inches and longer** sold during 2007 totaled 59.7 million fish, up 14 percent from the previous year. The average price per pound was \$1.15, up 4 cents from 2006. The value of sales for the 2007 marketing year was 80.0 million dollars, up 10 percent from 2006. Based on the dollar value, 67 percent were sold to processors and 16 percent were sold to fee and recreational fishing establishments.

The number of **6"- 12" trout** sold during 2007 totaled 4.99 million fish, a decrease of 20 percent from 2006. The average price per pound was \$2.95 during 2007, up 40 cents from the 2006 price. The total value of sales was 5.84 million dollars during 2007, a 9 percent decrease from the previous year. The major sales outlet for 6"-12" trout was to fee and recreational fishing establishments accounting for 45 percent of total sales, followed by other producers with 16 percent.

The number of **1"- 6" trout** sold during 2007 totaled 9.56 million, a 10 percent increase from the previous year. The average value per 1,000 fish was \$177 during 2007, unchanged from 2006. The total value of sales was 1.70 million dollars, up 10 percent from last year's total.

## Distributed Trout

Trout distributed for restoration, conservation, and recreational purposes, primarily by State and Federal hatcheries, included 8.20 million 12" or longer fish, 68.7 million 6"-12" fish, and 78.9 million fingerlings. The estimated value of fish and eggs distributed totaled 102 million dollars, up 16 percent from 2006.

## Trout Losses

Total losses of all trout intended for sale were 34.3 million fish during 2007. The top three categories were 86 percent lost to disease, 8 percent lost to predators, and 4 percent lost to drought.

## *Special Note*

Beginning with this report, *Trout Production* tables have been expanded to include a U.S. rather than a 20 State total. This includes an "Other States" category to represent those States not listed individually in the tables. Previous year data has been revised to allow consistency and comparability of the data.

## Reliability of Trout Production Estimates

**Survey Procedures:** Data for trout production are collected from all known producers. Individual NASS field offices maintain a list of all known trout producers and use known sources of producers to update their lists. All known trout producers are mailed a questionnaire as close as possible to January 1 and given adequate time to respond by mail. Those that do not respond by mail are telephoned or possibly enumerated in person during the middle of January. Care is exercised to ensure all operations are accounted for.

**Estimation Procedures:** Sound statistical methodology is employed to derive the estimates from reported data. All data are analyzed for unusual values. Data from each operation are compared to their own past operating profile and to trends from similar operations. Data for missing operations were estimated based on similar operations or historical data. NASS field offices prepare these estimates by using a combination of survey indications and historic trends. Individual State estimates are reviewed by the Agricultural Statistics Board for reasonableness.

**Revision policy:** Estimates for the previous year are subject to revision when current estimates are made. Revisions are the result of late or corrected data.

**Reliability:** Trout production estimates are based on a census of all known active producers and therefore, have no sampling variability. However, estimates are subject to errors such as omissions, duplication, and mistakes in reporting, recording, and processing the data. While these errors cannot be measured directly, they are minimized through strict quality controls in the data collection process and a careful review of all reported data for consistency and reasonableness.

## Terms and Definitions Used for Trout Production Estimates

**12" or Longer Fish:** Grown commercially for food, usually weighing from three-fourths to one and one-half pounds.

**6"-12" Fish:** Usually stockers that weigh less than three-fourths of a pound. They may be sold as foodsize fish.

**Fingerlings:** Fish usually from 1 to 6 inches long.

**Live Haulers:** Person who buys live fish on the farm and functions as a middleman.

**Chemicals:** Includes losses from pesticides or herbicide poisoning.

**Disease:** Includes losses from both parasitic and bacterial caused sickness.

**Drought:** Includes losses from lack of water causing oxygen depletion.

**Floods:** Includes losses from too much water washing the fish away.

**Predators:** Includes losses from mink, otters, birds, and other animals.

**Theft/Vandalism:** The unauthorized removal of fish and/or the destruction of property causing a loss of fish by intentional acts by persons known or unknown.
