Intentions to Raise Turkeys, 1973--20 States
Breeder Hens on Farms and Value December 1, 1970-72--26 States
Turkeys Raised, 1970-72--All States
Turkeys on Farms and Value January 1, 1971--All States

TURKEYS RAISED INTENTIONS:

Turkey growers in 20 States intend to raise 4 percent more turkeys in 1973 than in 1972, according to the Crop Reporting Board. An increase of 6 percent is intended for light breeds while the increase in heavy breeds is indicated to be 3 percent. If producers carry out present intentions, the 1973 turkey crop in the 20 States will total 127.6 million birds compared with 123.0 million raised in 1972. Producers in the 20 States intend to raise 113.1 million heavy breed turkeys in 1973 and 14.5 million light breeds.

The number of turkeys actually raised in 1973 may vary somewhat from the 1973 intentions of growers. Such changes may depend on reactions to this report, price of feed, supply and price of hatching eggs and poults, and prices received for turkeys during the next few months.

TURKEY BREEDER HENS:

Turkey breeder hens on farms December 1, 1972 in 26 States totaled 3,453,000, up 2 percent from a year earlier. The number of breeder hens on farms consisted of 3,060,000 heavy breeds and 393,000 light breeds. Heavy breeds increased 2 percent from December 1, 1971 and light breeds increased 8 percent.

The December 1, 1972 value of breeder hens on farms totaled \$22,535,000 compared with \$21,011,000 on December 1, 1971. The average value per bird of \$6.53 on December 1, 1972, compares with \$6.23 on December 1, 1971.

Heavy breed turkeys tested for pullorum disease July through November 1972 in the United States were 2 percent below the same period a year earlier. Light breed testings for the same period were up 58 percent.

Revision in Estimates: The 1965-70 turkey inventory and value, numbers raised, farm production, disposition and gross income estimates were reviewed and revised, if necessary, based on data obtained from the 1969 Census of Agriculture and other data which have become available since the original estimates were made. Revised estimates by States for the years 1965-70 are shown in Statistical Bulletin No. 497, "Turkeys." This bulletin is available upon request.

Revised turkey inventory and value estimates for January 1, 1971, by States, are shown on pages 6 and 7 of this publication. Inventory estimates for "total turkeys" were discontinued beginning with December 1971.
