WHEAT: U.S. 2015/16 wheat exports are lowered 25-million-bushels this month to 775 million. U.S. exports are lowered on increased international competition, especially from Canada. This export total is the lowest since 1971/72. U.S. wheat ending stocks are raised 25 million bushels and are the largest since 2009/10.

Global wheat supplies for 2015/16 are raised 2.1 million tons primarily on increased beginning stocks and slightly larger production. The largest change to beginning stocks is a 2.0-million-ton increase for China, which is raised on a multi-year revision in total use. World beginning stocks are raised 1.7 million tons. World wheat production remains record high and is raised 0.4 million tons led by a 0.5-million-ton increase for Argentina and a 0.3-million-ton increase for Ukraine. Kazakhstan is lowered 0.3 million tons. Foreign trade is raised 2.3 million tons led by a 1.5-million-ton increase for Canada exports on a fast pace to date. Argentina and Turkey exports are each raised 0.5 million tons. Imports are raised 0.5 million tons for Ethiopia on increased needs stemming from the drought, and 0.3 million tons each for China and South Korea.

World wheat consumption for 2015/16 is lowered 4.7 million tons led by a 4.0-million-ton decrease for China as government policies reduce the food and feed uses of wheat in favor of other grains. India consumption is lowered 2.9 million tons on government stocks data that was larger than expected. With wheat supplies increasing and total usage decreasing, global ending stocks are raised 6.8 million tons to a record 238.9 million tons.

COARSE GRAINS: U.S. feed grain ending stocks for 2015/16 are projected higher this month with corn imports raised and exports lowered. Corn imports are projected 10 million bushels higher based on recent imports of corn into southeastern U.S. feed markets. Corn exports are projected 50 million bushels lower as larger supplies of South American corn further increase competition for U.S. exports. Partly offsetting is a 25-million-bushel increase in projected U.S. corn use for ethanol based on the strong pace of ethanol production during January, as indicated by weekly Energy Information Administration (EIA) data, and higher forecast gasoline consumption. Corn ending stocks for 2015/16 are raised 35 million bushels. The projected range for the corn season-average farm price is narrowed 5 cents on both ends to \$3.35 to \$3.85 per bushel.

Global coarse grain supplies for 2015/16 are projected 1.3 million tons higher. Higher Brazil and Argentina corn production more than offset lower corn beginning stocks in these same countries and lower production elsewhere. Brazil and Argentina 2015/16 beginning stocks are lowered with higher 2014/15 exports. Brazil corn production for 2015/16 is raised 2.5 million tons based on higher first-crop yields and indications that strong domestic corn prices, reflecting the devalued local currency, will increase second-crop plantings. Argentina corn production is increased 1.4 million tons on higher area. Argentina corn production is revised

higher for 2014/15, also on higher area. South Africa corn production for 2015/16 is lowered 1.0 million tons, as continued historic drought conditions further reduce crop prospects despite some stabilizing rain during the month of January. Indonesia corn production is reduced 0.5 million tons. Other coarse grain production changes are mostly offsetting with sorghum lowered for Mexico, rye raised for EU, and barley increased for Argentina.

Global coarse grain consumption for 2015/16 is raised 0.9 million tons with foreign consumption up 0.2 million tons. The largest change this month is a 2.0-million-ton increase in China corn feed use as relative internal market prices are expected to support greater corn feeding at the expense of wheat. Corn use is also increased for Mexico, India and Turkey. Partially offsetting are corn feeding reductions for Brazil and Argentina. Sorghum feed use is lowered for Mexico.

Global coarse grain imports for 2015/16 are raised 4.3 million tons with corn imports higher for South Africa, Iran, India, Indonesia, Mexico, and Turkey. Corn exports are raised for Brazil, Argentina, and South Africa, but lowered for the United States. Barley exports are raised for Argentina and Kazakhstan, with higher imports for Saudi Arabia. Global coarse grain ending stocks for 2015/16 are slightly higher, as larger barley and rye stocks more than offset a small reduction for corn.

RICE: There are no changes to this month's 2015/16 U.S. rice supply and use projections. The all rice price is lowered \$0.40 per cwt at the high end and \$0.20 at the low end to a range of \$12.50 to \$13.30. The long-grain price is lowered \$0.20 per cwt at the midpoint and the medium/short-grain price is lowered \$0.60 per cwt at the midpoint. The price changes are made based on reported prices to date and expectations regarding prices for the remainder of the market year.

Global rice supplies for 2015/16 are reduced 1.0 million tons on decreased production and lower beginning stocks. The largest production change is a 0.5-million-ton decline for Thailand on the lack of water available. Brazil is down 0.1 million tons on updated government statistics, while crop estimates are lowered for Nicaragua and other Central American countries to reflect drought conditions. Beginning stocks are lowered 0.4 million tons primarily due to Vietnam. Global 2015/16 exports are lowered 0.5 million tons led by 0.3-million-ton reductions each for Thailand and Vietnam, both on lower exportable supplies. Global imports are reduced 0.2 million tons with the biggest reduction 150,000 tons for Iran.

World rice consumption for 2015/16 is lowered 0.6 million tons, but remains a record at 483.7 million tons. The largest reduction is for Thailand, which is lowered 0.3 million tons on a smaller crop. With the reduction in global supplies greater than the reduction in total use, world ending stocks are lowered 0.4 million tons to 89.3 million, the smallest since 2007/08.

OILSEEDS: U.S. soybean ending stocks for 2015/16 are projected at 450 million bushels, up 10 million from last month due to a lower crush. Soybean production, trade, and other uses remain unchanged. Crush is reduced 10 million bushels to 1,880 million reflecting a lower soybean meal export forecast. Meal exports are reduced on sluggish shipments and sales as well as greater expected competition from Argentina where larger projected soybean supplies boost soybean meal exports. Lower U.S. soybean meal exports are partly offset by increased domestic soybean meal use which is raised to reflect relatively strong October-December disappearance. Soybean oil stocks are projected lower as reduced

production more than offsets larger imports and a higher extraction rate. Soybean oil imports are raised on large shipments from Canada.

The 2015/16 season-average soybean price range projection is unchanged at \$8.05 to \$9.55 per bushel. Soybean meal and oil price projections are also unchanged at \$270 to \$310 per short ton and 28.5 to 31.5 cents per pound, respectively.

Global oilseed production for 2015/16 is projected at 527.4 million tons, up slightly from last month as an increase in soybean production more than offsets lower forecasts for peanuts and sunflowerseed. Soybean production in Argentina is projected up 1.5 million tons to 58.5 million on a higher yield projection. The revised yield forecast is in line with an adjustment to last year's yield and is also supported by beneficial rain that has improved crop prospects. Peanut production in India is reduced this month on lower area. Global sunflowerseed production is projected lower as a decrease for Russia more than offsets higher production in Ukraine.

Global 2015/16 soybean and product supply and use changes include increased soybean crush for Argentina and Canada, increased soybean meal and oil exports for Argentina, increased soybean oil exports for Canada, and reduced soybean meal exports for India. In addition to the United States, higher soybean meal disappearance is projected for India where soybean meal substitutes for lower peanut meal disappearance. Soybean meal disappearance is also raised for Canada. Global oilseed stocks are projected at 91.2 million tons, up 0.3 million. Higher soybean stocks in Argentina, the United States, and Turkey, more than offset lower rapeseed stocks in the EU and Canada.

SUGAR: U.S. sugar production for 2015/16 is projected at 8.849 million short tons, raw value (STRV). Production of Florida cane sugar is increased 62,539 STRV to 2.136 million based on a larger sugarcane crop reported by the National Agricultural Statistics Service (NASS). Beet sugar production is reduced by 147,594 STRV to 5.010 million due to lower expected sucrose recovery from sliced sugarbeets.

U.S. cane sugar refiners are expected to import more sugar in 2015/16 under the USDA re-export import program to take advantage of the large margin between domestic and world raw sugar prices. The increase is projected at 61,524 STRV, implying total imports of 300,000. Refiners have more than sufficient room on their license balances for this quantity of imports.

Deliveries for human consumption in 2015/16 are unchanged. Sugar deliveries are running slightly ahead of the same corresponding period last year but there are significant differences. Strong deliveries of sugar sold by U.S. cane sugar refineries are up 2.8 percent year-over-year. There is a stronger pace of direct consumption imports reflecting a pick-up in refined sugar imports from Mexico, and a continuing weakness in beet sugar deliveries to consumers that are down 9.5 percent year-over-year.

U.S. ending stocks for 2015/16 are projected at 1.565 million STRV, implying an ending stocks-to-use ratio of 12.8 percent.

For the 2015/16 Mexico deliveries for human consumption are reduced 43,953 metric tons (MT) to 4.344 million, reflecting changes by the *Comite Nacional Para El Desarrollo Sustentable de la Caña de Azucar* (CONADESUCA).

LIVESTOCK, POULTRY, AND DAIRY: The 2016 forecast of total red meat and poultry production is raised from last month as higher forecast pork and broiler production more than offsets reduced forecasts for beef and turkey. USDA's *Cattle* report, released January 29, estimated that the cattle inventory continued to increase and pointed to a higher level of cattle outside feedlots on January 1, 2016. However, with lower year-over placements in fourth-quarter of 2015 and only modest increases expected in first-half 2016 placements, marketings and fed cattle slaughter forecasts for 2016 are reduced. Partly offsetting the lower fed cattle slaughter is higher expected cow slaughter and an increase in cattle carcass weights as the pace of marketings is slowed. Pork production is raised as slaughter during January was above expectations. Broiler production is higher as recent hatchery data shows faster-than-expected growth in chicks placed and bird weights continue to increase. Turkey production is reduced on hatchery data. Egg production is raised on increased hatching egg production. Estimates of 2015 meat and egg production are adjusted to reflect December data.

Beef and pork import and export forecasts for 2016 are unchanged from last month. The broiler export forecast is lowered as South Korea reinstated its ban on imports of uncooked U.S. poultry following the discovery of HPAI in Indiana in mid-January. Turkey exports are unchanged. The egg export forecast is unchanged, but the import forecast is raised. Meat and egg trade estimates for 2015 are updated based on data for December.

Cattle prices for 2016 are raised from last month on higher expected prices in the first quarter. First quarter hog prices are lowered from last month as supplies are expected to support higher slaughter levels; however, the forecast of the annual price is unchanged. Broiler prices are lowered from last month on weaker prices to date. The turkey price is unchanged. Egg prices are raised in the first quarter, but lowered in the second with the annual average price lowered from last month.

The milk production forecast for 2016 is raised from last month as the cow herd is adjusted slightly to reflect the January 1 dairy cow inventory reported in USDA's *Cattle* report and milk per cow is raised for the first quarter. Beginning stocks are raised from last month as cheese stocks at the end of 2015 were high. Both fat basis and skim-solids exports for 2016 are reduced from last month reflecting continued pressure on cheese, nonfat dry milk (NDM), whey, and lactose exports, due to large global supplies and a relatively strong dollar. Imports are unchanged from last month. For 2015, production, trade, and stock estimates are updated based on data through December.

Product price forecasts for NDM and whey are forecast lower as U.S. prices continue to reflect weakness in international markets. The butter price forecast is raised as domestic demand remains strong. The cheese price forecast is unchanged from last month, although the range is narrowed. The Class III price is lowered on lower whey prices. The Class IV price is down as a lower NDM price more than offsets a higher butter price. The all milk price is forecast at \$15.30 to \$16.00 per cwt.

COTTON: A 5-percent reduction in exports is raising projected 2015/16 U.S. cotton ending stocks this month. The production and domestic mill use forecasts are unchanged. Exports are reduced 500,000 bales to 9.5 million, reflecting continued sluggish export sales, attributable mainly to sharply lower imports by China relative to last season. Ending stocks are now projected at 3.6 million bales, or 27.5 percent of total use. The forecast range for the marketing year average price received by producers of 58 to 61 cents per pound is raised 1 cent on the lower end, with the mid-point now forecast at 59.5 cents.

The world 2015/16 cotton forecasts include lower expectations of consumption and trade relative to last month. Consumption and imports are reduced for China, based on continued sluggish demand, and for Pakistan, where a slower pace of imports indicates reduced demand. World consumption is lowered 1.3 million bales, which also includes reductions for India and Brazil. With global imports nearly 1.0 million bales below last month, exports are reduced for Brazil, India, and Pakistan, in addition to the United States. Global stocks are now forecast at just over 104 million bales.

Approved by the Secretary of Agriculture and the Chairman of the World Agricultural Outlook Board, Seth D. Meyer, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

Avg. Farm Price (\$/cwt) 1/ 6/ 9/	19.20	18.30	16.60 - 17.60	16.10 - 16.90
California 10/	20.70	21.60	20.00 - 21.00	19.00 - 20.00
Other States 1/	15.70	14.40	11.50 - 12.50	11.70 - 12.30

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of beginning stocks by type (in mil. cwt): 2013/14-2.1; 2014/15-2.3; 2015/16-1.9. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. The 2013/14 and 2014/15 milling yield is based on the Farm Service Agency (FSA) warehouse stored loan data for long, medium, and short grain rice. The 2015/16 milling yield is calculated using the previous five-year Olympic average-- 2010/11-2014/15. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The medium/short-grain season-average- farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. For example, the average difference between the August WASDE SAFP forecast and the final price has averaged \$1.65 per cwt from 2008/09-2013/14, with a high of \$3.50 per cwt in 2008/09 and a low of \$0.60 per cwt in 2009/10. 10/ Marketing year beginning October 1.

1/ Fiscal years beginning Oct 1. Historical data are from FSA "Sweetener Market Data" (SMD). 2/ Production projections for 2014/15 and 2015/16 are based on Crop Production and processor projections where appropriate. 3/ For 2015/16, WTO raw sugar TRQ shortfall (99). For 2014/15, WTO raw sugar TRQ shortfall (69). 4/ Includes sugar under the re-export and polyhydric alcohol programs. 5/ For 2013/14, other high-tier (5) and other (0). For 2014/15, other high-tier (15) and other (0). For 2015/16, other high-tier (15) and other (0). 6/ Combines SMD deliveries for domestic human food use and SMD miscellaneous uses. 7/ Transfers to sugar-containing products for reexport, and for nonedible alcohol, feed, and ethanol.

1/ Data based on local marketing years except Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil, Paraguay, and Uruguay. 4/ China, European Union, Japan, Mexico, and Southeast Asia (includes Indonesia, Malaysia, Philippines, Vietnam, and Thailand).

Product Prices 1/	<i>Dollars Per Pound</i>					
Cheese	1.7683	2.1551	1.6454	1.6454	1.545- 1.625	1.550- 1.620
Butter	1.5451	2.1361	2.0670	2.0670	1.890- 2.000	1.990- 2.090
Nonfat Dry Milk	1.7066	1.7682	0.9016	0.9016	0.865- 0.925	0.775- 0.835
Dry Whey	0.5902	0.6538	0.3804	0.3804	0.240- 0.270	0.230- 0.260
	<i>Dollars Per Cwt</i>					
Milk Prices 2/						
Class III	17.99	22.34	15.80	15.80	14.05- 14.85	14.05- 14.75
Class IV	19.05	22.09	14.35	14.35	13.35- 14.25	13.00- 13.80
All Milk 3/	20.05	23.97	17.08	17.08	15.35- 16.15	15.30- 16.00

1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

WASDE - 550 - 35

Reliability of February Projections 1/

Note: Tables on pages 35-37 present a record of the February projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 0.6 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 1 percent. The average difference between the February projection and the final estimate is 2.4 million tons, ranging from 0 million to 7.3 million tons. The February projection has been below the estimate 26 times and above 8 times.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. Marketing years 1981/82 through 2014/15 for grains, soybeans, and cotton. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2014/15. Calendar years 1983 through 2014 for meats, eggs, and milk. Final for animal products is defined as the latest annual production estimate published by NASS for 1983-2014.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/online>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division (PECAD) of the Foreign Agricultural Service. PECAD is located at www.pecad.fas.usda.gov/.

Metric Conversion Factors

1 Hectare = 2.4710 Acres

1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
Wheat & Soybeans	bushels	.027216
Rice	cwt	.045359
Corn, Sorghum, & Rye	bushels	.025401
Barley	bushels	.021772
Oats	bushels	.014515
Sugar	short tons	.907185
Cotton	480-lb bales	.217720
